ATHENA (116X50) 2B 1D

ATHENA EXTRA (116X50) 2B 1D

PYRAMIS uses traditionally, the best quality performance Stainless Steel material AISI 304. This type of stainless steel contains a significant amount of chromium, and sufficient nickel to "stabilise" the microstructure, that gives to these steel goods formability and ductility. The typical composition is 18% chromium and 10% nickel and this makes PYRAMIS' Stainless Steel Sinks extremely resistant to rust or corrosion in normal household conditions.

For even greater safety, the surface of Stainless Steel Sinks provides protection against bacteria and makes the sink perfectly healthy and suitable for food contact.

As proof of the exceptional quality materials, Stainless Steel Sinks carry a Lifetime Guarantee.

PYRAMIS Stainless Steel Sinks for inset installation are provided with a preinstalled sealant of polyurethane underneath the sink, thus, the installation of an inset sink becomes much easier and friendlier since, the sealant that is already installed provides time-saving compared to other sealing methods.
