Tireless, we are always looking ahead

Pyramis Metallourgia A.E. is a Greek company that produces and trades in integrated kitchen and bathroom solutions. It was started as a family business in 1960 by Alexandros Bakatselos, and today it is one of the largest stainless steel sink producers in the world, with powerful strategic partnerships globally.

It has its headquarters in Thessaloniki, where its factory is based, a true achievement for Greek standards, as it is one of the largest stainless steel production units in the world. In 2013 operations began at a new granite and synthetic sink plant in Kilkis.

In 2010 Nikolaos Bakatselos took over management of the company.

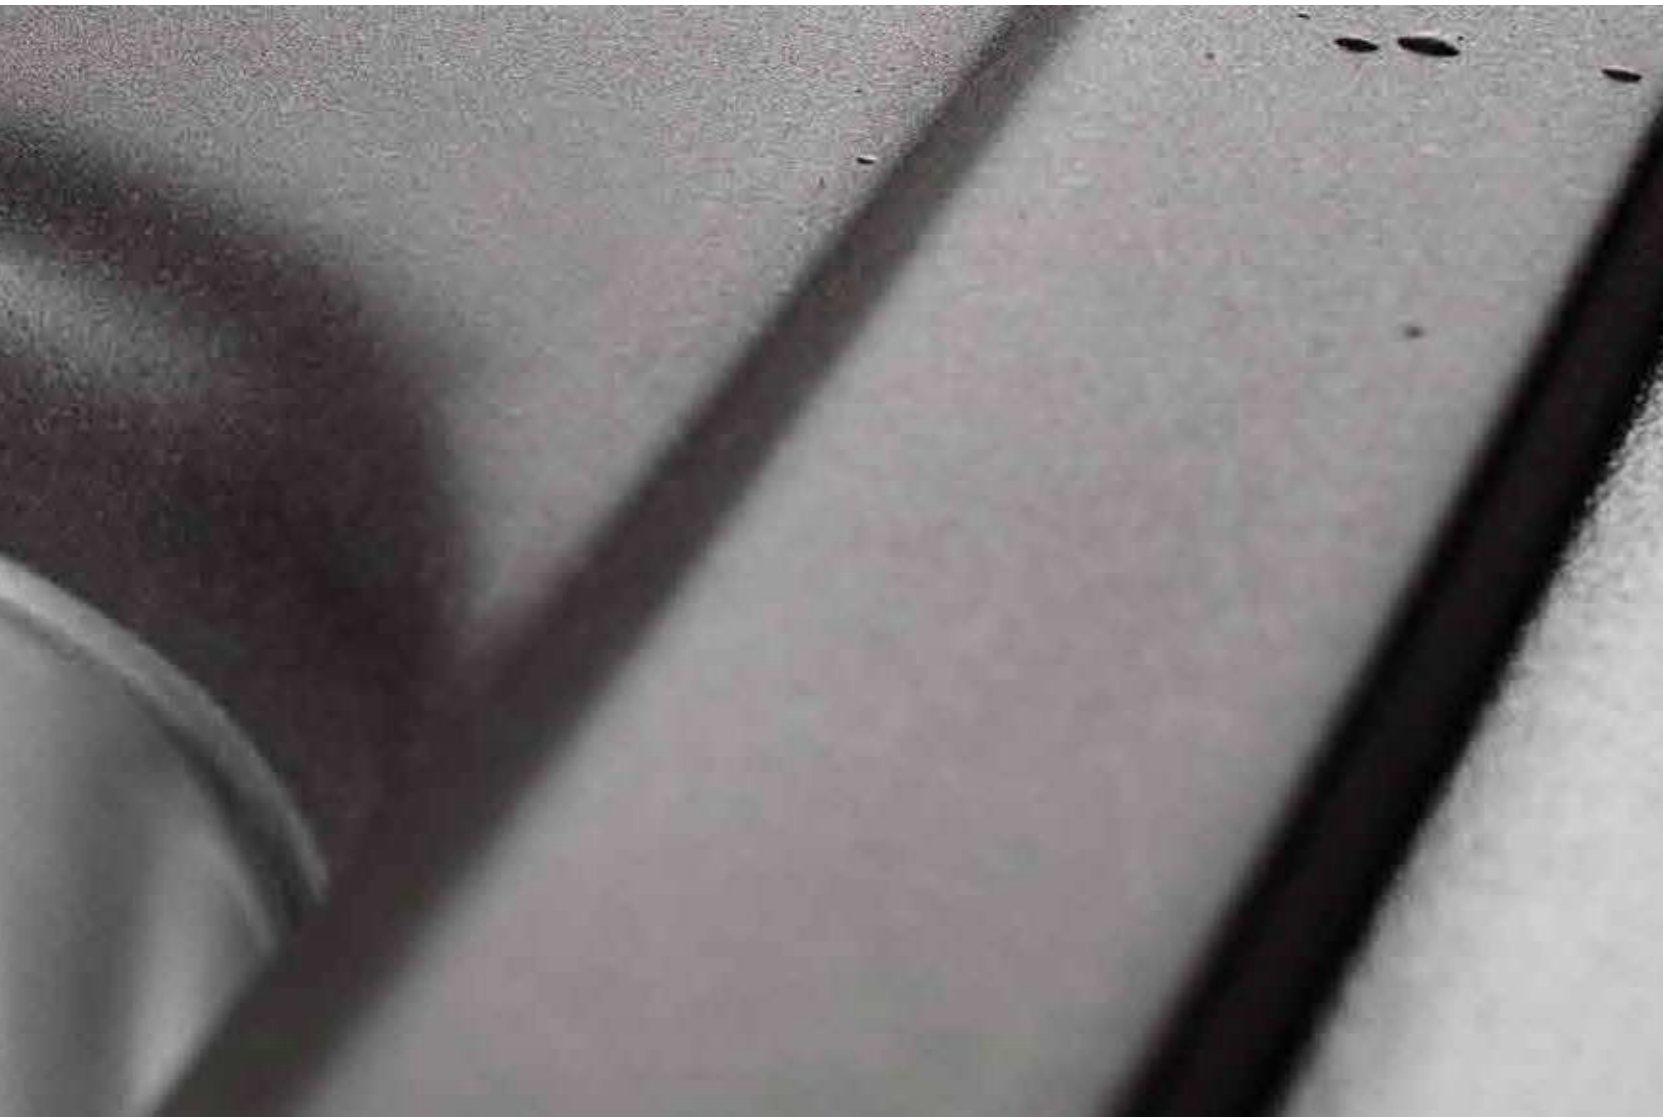

Alexandros Bakatselos

Founder

Nikolaos Bakatselos

CEO of Pyramis Metallourgia A.E.

Ready for the future

By combining quality materials and cutting edge means of production PYRAMIS provides modern bathroom and kitchen solutions that stand out for their high quality, functional design, and added value for customers.

In passionately serving its vision of making daily life easier and more pleasant, it is constantly investing in technological and mechanical equipment, as well as in the know-how and expertise of its people, continuously broadening its range and creating new innovative products for all.

Every product that bears the name PYRAMIS is designed with respect towards consumers, employees, and the environment, as the most modern quality assurance, employee health and safety, environmental management, and supply chain safety standards are implemented in its manufacturing.

This world,
a small world
a great world

PYRAMIS has a presence on all 5 continents with export activities that reach 97% of its overall production and exports to more than 68 countries. Thus, its products are used in millions of households around the world, making people's daily lives more beautiful and functional.

Greek and global, it has set up 9 subsidiaries in Poland, the UK, Germany, Romania, Italy, Russia, Bulgaria, UAE, and the Czech Republic. In Greece it is a leader in the Kitchen and Bathroom sector, with products that Greek consumers trust.

Numbers count

60+ Years of Expertise

Top leading stainless steel sinks producer Worldwide.

550 Employees

For PYRAMIS Group the most important asset is human capital.

5.000 Points of Sale

Wide distribution network worldwide. 2.000 points of sale in Greece, with leading position in the Greek market.

9 Subsidiaries

In Poland, United Kingdom, Germany, Romania, Italy, Russia, Bulgaria, United Arab Emirates & Czechia.

97% Exports

International sales account for more than 85% of total company's turnover, with almost 97% of its production exported all over the world.

Presence in 85 Countries

Brand presence and Direct Sales in 68 countries worldwide, while PYRAMIS products are distributed in 85 countries worldwide.

1,67M. Sinks

Production capacity of 1,500,000 Stainless Steel Sinks & more than 170,000 Composite Sinks annually.

Strategic Partnerships

Long terms partnerships, with strategic customers, distributors and partners around the globe.

stainless steel sinks

Stainless steel finish

PYRAMIS uses traditionally the best quality performance Stainless Steel material AISI 304. This type of stainless steel contains a significant amount of chromium, and sufficient nickel to «stabilise» the microstructure, that gives to these steel goods formability and ductility. The typical composition is 18% chromium and 10% nickel and this makes PYRAMIS' Stainless Steel Sinks extremely resistant to rust or corrosion in normal household conditions.

Choose between 4 different stainless steel finishes:

POLISHED

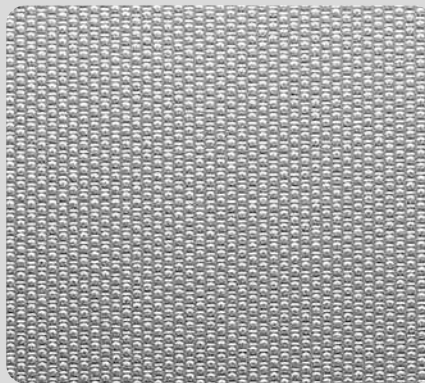

SATIN

BRUSHED

LINEN

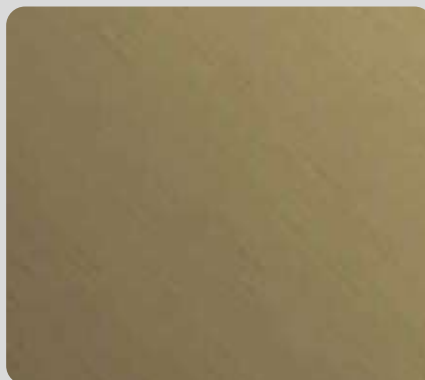

With ASTRIS COLORA, PYRAMIS introduces a stainless steel material with a special PVD coating in 3 modern colors:

GUN METAL

GOLD

COPPER

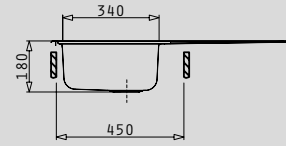

Installation

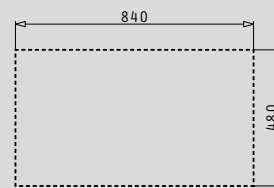

Factory fitted seal

In order to achieve water sealing, a sealant must be placed between the sink and the counter. For much easier installation, all inset sinks are provided with preinstalled sealant of polyurethane underneath the sink (**EASY FIX**).

Minimum base unit

The stated size refers to the minimum size of base unit required to fit the sink bowl(s), overflow, waste pipework & mixer tap.

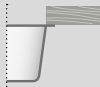

Cut out drawing

Is a guide which helps the accurate cutting of the worktop. It includes the cutout length and width of the relevant model for inset, undermount or flushmount fitting. It is suggested to make a cut out test by installing the sink into a low-cost surface before proceeding with the cutting of the final surface.

Inset

The rim of the sink sits on the worktop after installation.

Undermount

The rim of the sink is placed underneath the worktop.

Flushmount

The rim of the sink is installed at exactly the same level with the worktop.

Onset - 3 Sides Down

Three of the four sides are folded down but the back edge side of the sink is folded up in order to create an upstand against the wall.

Onset - 4 Sides Down

The onset sink is formatted in a way that all four sides are folded down.

Wall mounted

The sink is equipped with brackets suitable for wall mounted installation.

Flexibility in design

PYRAMIS sinks are offered in a huge variety of designs, dimensions and types. Choose among large or small bowls, single or double bowls, with or without drainage space, with vertical lines or rounded design. Choose the sink that best meets your needs and fits harmoniously into your space.

Safety

All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

Waste valves

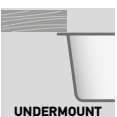

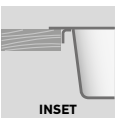

The diameter of the outflow defines the type of waste valve. Sinks are available with 60mm, 92mm diameter or square outflow (depending on the model).

Accessories

Steel colanders, wooden and glass chopping boards, soap dispensers and colanders will make your daily work in the kitchen easier.

stainless steel sinks siphons

pyragranite sinks

Composition - colors

Pyragranite sinks consist of 80% natural quartz (silica), while the remaining 20% of the mixture consists of resins and enhancing substances. You can find the PYRAMIS Pyragranite Sinks in 6 different colors:

SNOW

GRAPHITE CARBON

DARK BEIGE

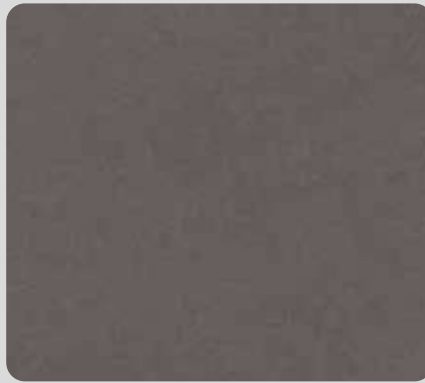

IVORY

NEW!

IRON GREY

INDUSTRIAL GREY

NEW!

Safety

Mold, stains and unpleasant smells are often caused by bacteria. Pyragranite homogenous, without pores, surface prevents bacteria accumulation thus making your sink cleaner and safer.

Features

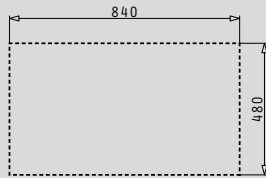

Pyragranite sinks show high heat resistance even after contact with an object at 200°C. They can resist an impact of an 1kg object dropped from a height of 70cm. They do not discolor even if they come in contact with domestic cleaning kitchen products.

Certifications

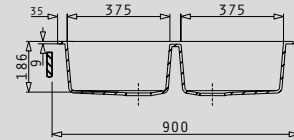

The strict quality controls carried out by PYRAMIS validated in compliance with EN13310 standard, reassure that the sinks comply with the most demanding quality standards in regards with their durability and hygiene.

Installation

Cut out drawing

Is a guide which helps the accurate cutting of the worktop. It includes the cutout length and width of the relevant model for inset, undermount or flushmount fitting. It is suggested to make a cut out test by installing the sink into a low-cost surface before proceeding with the cutting of the final surface.

Minimum base unit

The stated size refers to the minimum size of base unit required to fit the sink bowl(s), overflow, waste pipework & mixer tap.

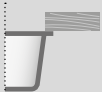

Inset

The rim of the sink sits on the worktop after installation.

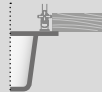

Flushmount

The rim of the sink is installed at the same level with the worktop.

Undermount (total cover)

The rim of the sink is completely covered underneath the worktop.

Undermount (partial cover)

The rim of the sink is partially covered underneath the worktop. The specific installation type allows the installation of the mixer and the soap dispenser on the sink and not on the worktop (SIROS Series).

Flexibility in design

PYRAMIS sinks are offered in a huge variety of designs, dimensions and types. Choose among large or small bowls, single or double bowls, with or without drainage space, with vertical lines or rounded design. Choose the sink that best meets your needs and fits harmoniously into your space.

Safety

All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

Waste valves

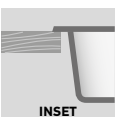

The diameter of the outflow defines the type of waste valve. Sinks are available with 92mm diameter or rectangular outflow (depending on the model).

Accessories

Steel colanders, wooden and glass chopping boards, soap dispensers and colanders will make your daily work in the kitchen easier.

fibertek sinks

Material - colors

Sheet Moulding Compound (SMC) is an innovative compression process of a reinforced molding. It consists of fiber-based glass mixed with polyester and other resins. You can find the PYRAMIS Fibertek Sinks in 4 different colors:

WHITE

BEIGE

GREY

BLACK

Safety

Mold, stains and unpleasant smells are often caused by bacteria. Fibertek homogenous, without pores, surface prevents bacteria accumulation making your sink cleaner and safer.

Features

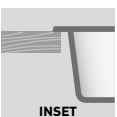

Fibertek Sinks appear to have chemical resistance to strong cleaning chemicals, high impact impedance, along with excellent temperature and fire resistance. They are easy to be cleaned and suitable for all types of work surface (wood, plastic, marble, etc.)

Certifications

Subjected to tests throughout the manufacturing process and validated in compliance with EN13310 standard.

KEROX

KTW

Cartridge

Kerox mechanisms, from the leading company in its field, ACS certified, with ceramic discs, and resistance up to **500.000 cycles** (ASME A I12 I8 IM, EN 817). New type of cartridge that makes it possible to optimize consumption, avoid useless energy overloads and reduces noise significantly (**Sound Free**).

Aerator

Air Force aerators with flow limiters, small devices installed to the tap, which, by mixing water with air, allow up to **30%** water saving, while obtaining a better flow jet (**WRAS certified**).

Galvanization – Pure Water Process

An innovative and pioneering galvanization method that prevents the leaching of toxic metals, such as lead and nickel, in drinking water by **Pure Water Process (EN 248)**.

Certified Raw Material

Brass alloy of quality and composition in compliance with the highest international standards, and low lead levels according to the European Directives EN 1982:2000, EN 12165:99 and EN 12164:01 (**Lead Approved**).

Hoses – Components

Environmental friendly components made of non-toxic material that do not affect the taste or scent of water, with excellent mechanical properties, and certified according to the international quality standards NSF, KTW, DVGW (**Scent Free, Taste Free**).

Painting – Chroming

Epoxy painting, of more than 20 micron thickness and resistance to saline-spray tests of more than **300 hours**.

cookerhoods

Carbon filters

Carbon filters recirculate the purified air back to your kitchen. They cannot be cleaned or repaired; they can only be replaced when necessary. Their saturation depends on the level and time of use, type of cooking and the frequency that the metal filters are cleaned.

Device control

Touch control, functional push, sliding or electronic buttons, ensure ease of use and excellent aesthetics.

Lighting

The use of LED lighting ensures efficient & constant light flow, longer life cycle and energy saving.

Metallic filters

They protect the inner parts of the cookerhood by preventing the absorbed grease and fumes from harming the fan or the motor and add to the aesthetics of the cooker hood. They are easy to remove and can be washed by hand, or in the dishwasher.

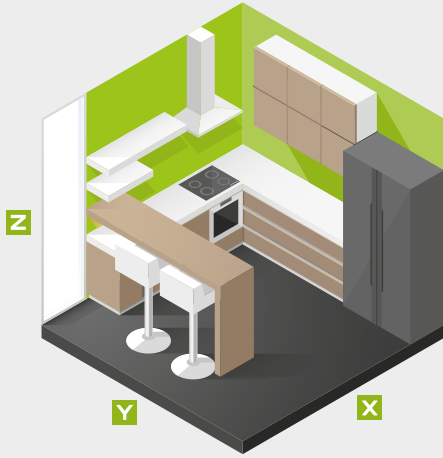

Abysso: Cookerhood evolution

The Abysso is a unique solution for the kitchen, as it brings together an induction hob with a built-in cooker hood under the workbench. An evolution in both aesthetics and performance, it combines the perfect design and extraction performance and starts a revolution in the cooking experience in an innovative way: an odorless kitchen with complete visual freedom.

Silent Power: Abysso Cookerhood functions within a silent sound spectrum, even with its maximum power.

Hidden Extraction: The Abysso Cookerhood is completely covered by the hob surface and integrated under the workbench.

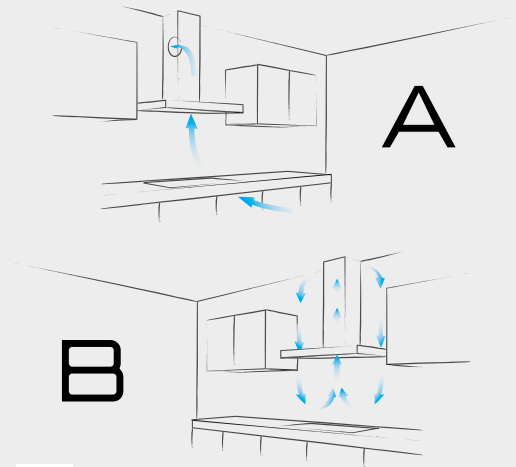

x12

Choose the right cookerhood for your kitchen!

We calculate the volume of the room in cubic meters and then we multiply it by 12. (An effective cooker hood refreshes air in the kitchen 12 times per hour).

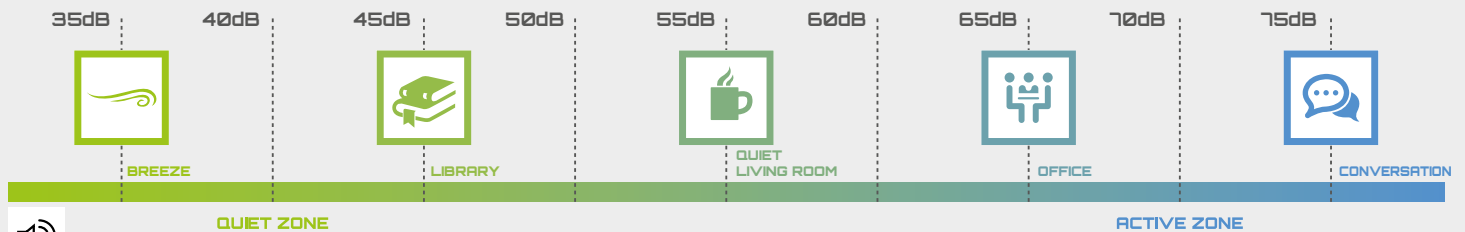

Example: Kitchen room dimensions: 6 meters long, 3 meters wide and 2.5 meters high. The volume of the kitchen room is equal to length x width x height: $6 \times 3 \times 2.5 = 45\text{m}^3$. Given that the air in the kitchen should be refreshed 12 times per hour, then the extraction rate required should be $12 \times 45\text{m}^3 = 540\text{m}^3$. So the recommended cooker hood should have extraction capacity at least $540\text{m}^3/\text{h}$.

Cookerhood functions

A. Air extraction: Metal filters withhold airborne grease and channel the filtered air outside through the ducting pipe.

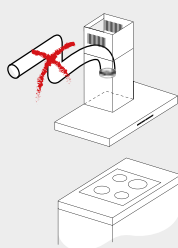

B. Recirculating: The absorbed air is filtered through activated charcoal filters that withhold odors, channeling the purified air back to the room.

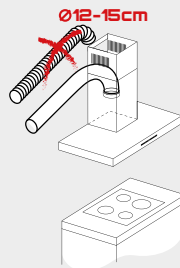

Low noise level

Pyramis cooker hoods keep the noise levels low, creating ideal home conditions. Noise level is measured in dB and PYRAMIS cookerhoods level equals to an "office".

1
Avoid connections with curves or angles.

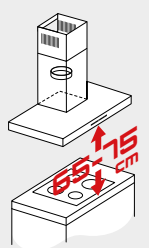

2
Use a cylindrical drain pipe (12-15cm in diameter), smooth surface (not corrugated) for optimum vapor flow.

3
Avoid exhaust pipes longer than 5 meters.

4
The distance between the hood and the hob should be between 65cm and 75cm.

Installation for maximum performance

Did you know that if the cooker hood is fitted with an outlet pipe of more than 6 meters and 3 angles of 90°, its output is reduced by 50%? By following the above simple tips, you ensure the cookerhood's maximum performance by installing it correctly!

ovens / microwave ovens

Device control

PYRAMIS ovens have advanced control systems with touch controls and knobs. With ergonomic design and easy handling, the operation of the oven becomes very easy and efficient.

Anti-spot surface

The coating of the external stainless steel surfaces prevents the formation of marks and stains from daily use, keeping them clean for a longer period of time.

Soft close

New, specially designed hinges, softly and quietly close the oven door with a gentle touch, reducing vibrations and noise.

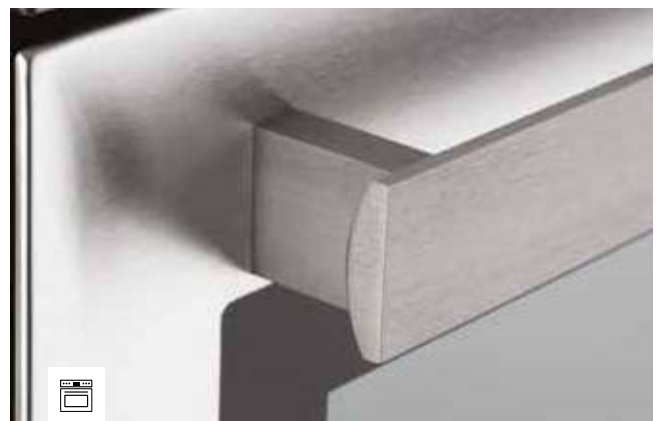

Easy to clean

The enameled cavity of the oven is made of an extremely durable and strong material and provides additional insulation, while it does not absorb grease and food residues, so that they can be easily and effortlessly removed.

Cooling system

The ventilation system cools the oven efficiently, maintaining the appropriate temperature both around the oven (cabinets) and at the front (door), ensuring maximum safety and efficiency.

New handles

High aesthetics, durability and ergonomic design are the key features of the new PYRAMIS oven handles.

Deep tray

For your every day cooking needs, a deep tray is provided with every PYRAMIS oven.

Telescopic rails

Cooking and supervising your food has never been easier and safer. Just place your tray in the telescopic rails and overlook it during cooking, simply by pulling it in and out.

Side racks

Side racks protect the enameled surface of the oven cavity from scratches, extending its lifetime and at the same time offer you the ability to move your tray inside out of the oven easily and effortlessly.

Double glass door with removable inner glass

The double glass door maintains heat inside the oven, optimizing energy consumption while preserving safety by keep the outer surface of the oven door cool. It is easily detachable for quick and efficient cleaning.

Digital auto programmer

Baking becomes a piece of cake even for beginners. Set the desired parameters (on/off time, temperature, type of food, etc.) and let the oven do the cooking for you. The results will amaze you!

Microwave ovens

PYRAMIS microwave ovens are a smart solution for every kitchen. With a large capacity and automatic functions, they respond quickly and effortlessly to all your needs in the kitchen, whether this is making your coffee, defrosting your lunch or baking your dinner.

Energy class

PYRAMIS ovens are classified in energy class A in accordance with the standards of the European Union, maintaining the power consumption at low levels for more efficient cost saving and environment protecting.

INSTALLATION

hobs

Hob profiles

Inox framed, frameless or beveled hobs that contribute to the style and determine the aesthetics of your kitchen.

Control

Use the high tech touch controls or rheostatic knobs to easily and safely operate your appliance.

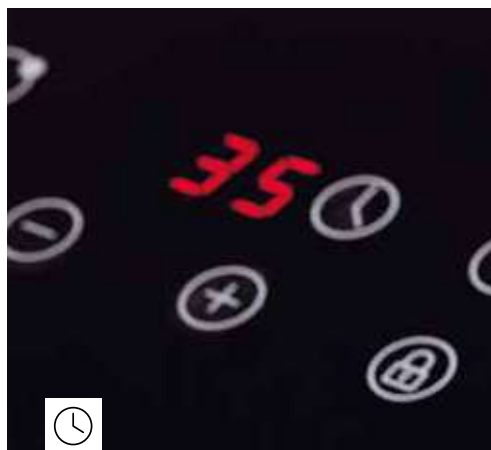

Overflow safety device

OSD turns the hob off, in case of fluid overflow on the device's surface while heating, ensuring maximum safety.

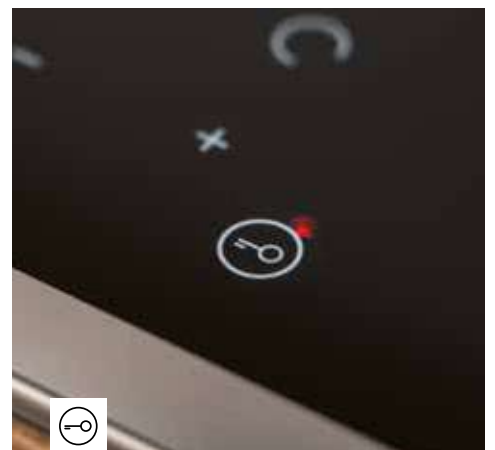

Residual heat indicator

A red digital indicator that warns that the relevant zone is still hot.

Timer

Automatically terminates the operation of the hob at the end of the desired cooking time.

Safety lock

All hob functions can be locked to prevent accidental activation or child intervention.

Induction hobs

The induction hob is based on the natural phenomenon of induction, which converts electromagnetic energy into heat. When an electric current is activated, inductors beneath the hob's surface react when a ferrous pan is situated above. The heat is produced directly onto the cookware.

Thus the boiling time can be reduced up to 50% in comparison to conventional electro-ceramic hobs and therefore cost and energy can be satisfactorily saved. Also, induction hobs are very easy to clean because any food splatters never burn on to the cool surface, so are very easily wiped off.

Booster Zone

Speeds up the cooking time, providing a higher power level for 5 minutes straight.

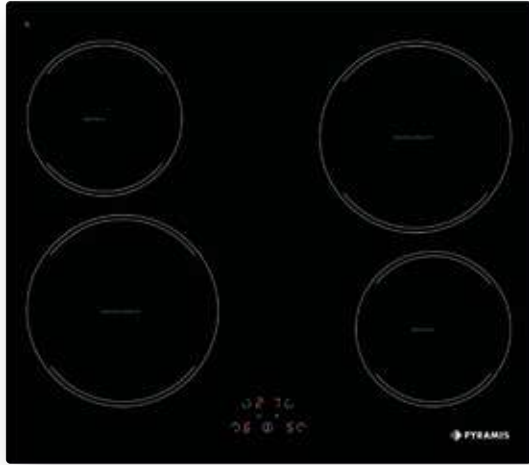

Induction hobs & cookware

Use proper cookware with magnetic bottom while operating your induction hob. Check the bottom of your cookware for the induction hob logo.

INSTALLATION

dishwashers

Aqua stop system

The aqua stop system ensures the safe operation of the washing machine in case of a leakage or overflow. It automatically shuts off water supply while the pump empties the water inside the dishwasher. This allows you to leave the washing machine on even when you are away, or you sleep.

Flexibility

The PYRAMIS dishwashers are automatically adjusted in various detergent: liquid, powder, tablet 3 in 1, without the need to select a special function. In addition, the lower basket has movable elements and adaptable placements for easy loading, ensuring the perfect washing and drying effect.

Easy to use

Carefully designed user's interface for easy operation. The multiple programs completely cover even the most demanding needs, saving energy and time.

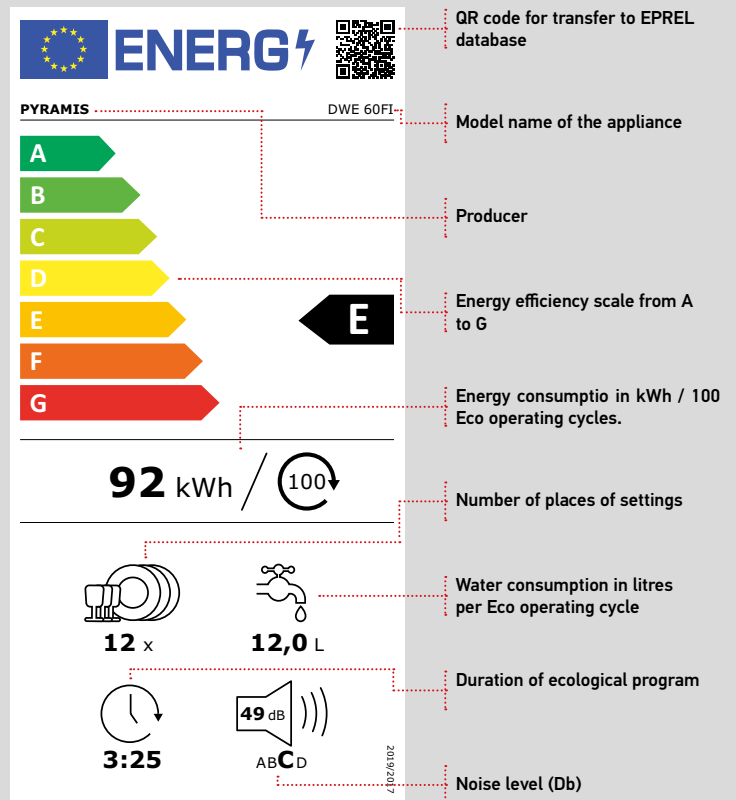

New energy label

As of 1st March 2021, the new version of the energy-EU label is in effect.

In the first phase, it will concern the category of refrigerators, freezers, washing machines, dishwashers, and TVs, while is expected to be extended to other categories in the coming next years. The adjusted energy rating, refers to a more simplified form of scale from A to the G, cancelling the pre-existing scale which included A+ A++ or A+++ ratings.

The purpose of this change is the easier access of consumers in energy information, so that they can control electricity consumption, the environmental awareness and the most sustainable consumer choices. At the same time, the electrical appliance industry is being activated for research and development of innovative products less energy consuming and more environmentally friendly.

The new energy label has a QR code, which can scan the consumer via smartphone and lead to the European database (EPREL), where he can find additional product information. In this way, the consumer will be able to compare products to find the product that suits better his needs.

Intensive (65°C) - for dishes with dried-on residues

Hygiene (70°C) - hygienic dish washing for very dirty dishes

INSTALLATION

refrigerators

Smart features

PYRAMIS refrigerators have a variety of features that guarantee their proper function and also your own convenience. Reversible door with soft closing and adjustable feet for easy installation, quiet operation, glass shelves for easy food storage and better visibility, led lighting inside and proper distribution and circulation of cold air for faster and more efficient food cooling. Thus, they ensure the maximum preservation of quality and taste at your table.

Respect for the environment

PYRAMIS refrigerators are certified according to the latest European standards for both their proper functioning as well as for their respect for the environment. The refrigerant that is used is isobutane (R 600a) and does not contain harmful chemicals such as CFC.

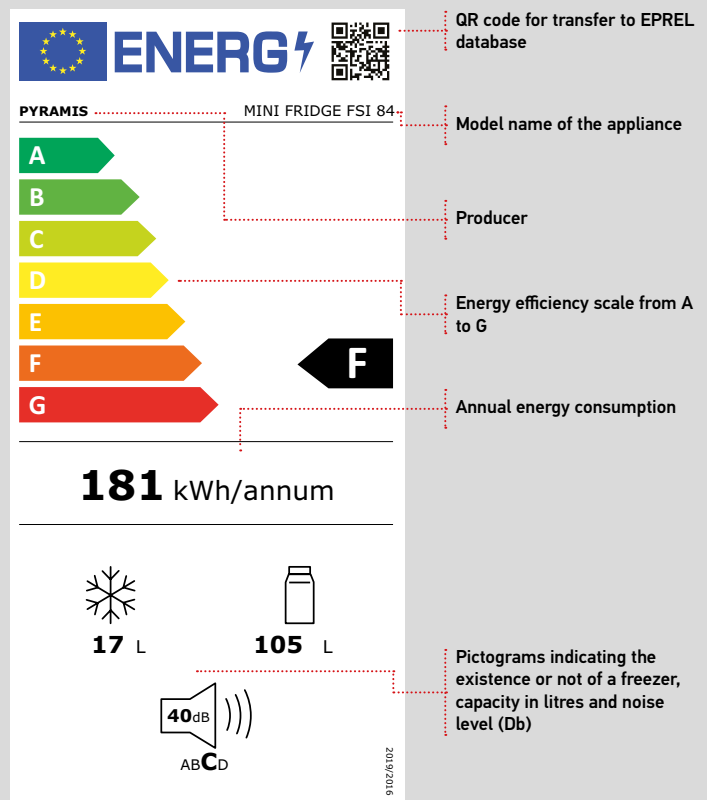

New energy label

As of 1st March 2021, the new version of the energy-EU label is in effect.

In the first phase, it will concern the category of refrigerators, freezers, washing machines, dishwashers, and TVs, while is expected to be extended to other categories in the coming next years. The adjusted energy rating, refers to a more simplified form of scale from A to the G, cancelling the pre-existing scale which included A+ A++ or A+++ ratings.

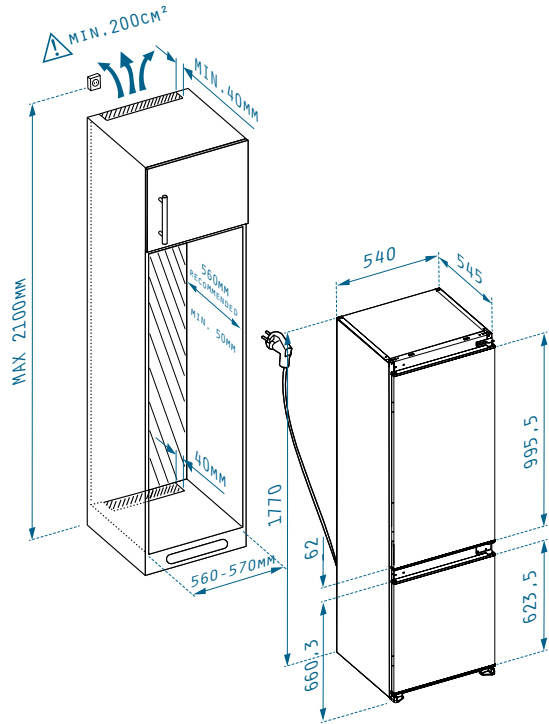

The purpose of this change is the easier access of consumers in energy information, so that they can control electricity consumption, the environmental awareness and the most sustainable consumer choices. At the same time, the electrical appliance industry is being activated for research and development of innovative products less energy consuming and more environmentally friendly.

The new energy label has a QR code, which can scan the consumer via smartphone and lead to the European database (EPREL), where he can find additional product information. In this way, the consumer will be able to compare products to find the product that suits better his needs.

Built-In Refrigerator - Freezer BBI 177

Ar. Number
031000804

FEATURES

Dimensions: 177x54x54,5cm

3 adjustable glass shelves
