10 facts & figures about PYRAMIS

01 A family-owned company of Greek origin, which was successfully transformed into an international business, owning 8 subsidiaries in key markets in Europe & Asia.

02 A world class supplier of integrated solutions for the kitchen & bathroom needs, focusing on top quality for an affordable price.

03 Among the leading companies in the sector worldwide with a production capacity of 1,500,000 stainless steel sinks. 170,000 composite sinks and 210,000 ceramic hobs annually.

04 Pyramis products are exported till today to 83 countries and sum up to 85% of the total company's turnover.

05 The company owns 2 manufacturing plants: The stainless steel sinks factory and HQs in Liti, Thessaloniki and in Oinofyta, close to Athens, the brand new production premises for MDAs.

06 Employing more than 450 people in 9 countries.

07 Total investments exceeding € 17,000,000 during the last decade.

08 PYRAMIS is compliant with ISO 9001 (Quality Standards), ISO 14001 (Environmental Management Systems), ISO 45001 (Occupational Health and Safety Management System), ISO 28000 (Security Management Systems for the Supply Chain).

09 A brand with a leading position in the Greek market and in the main European countries in sinks, electrical appliances and cookware.

10 Strong and long-lasting business relations with major global key accounts.

Our journey

1960

Foundation of PYRAMIS and development of production line.

1977

Introduction of new production line of stainless steel cookware.

1999

Expansion period: Inauguration of first subsidiaries and exports grow.

2013

New manufacturing plant for colored sinks.

2018

Exclusive distributorship of the brands Körting & Gorenje for Greece and Cyprus.

2025

Oven and cookerhood lines **Made in Greece** with latest technology and specifications.

2022

New manufacturing plant for electrical appliances.

Ongoing upgrade of our products covering customer needs and market demands.

Our production lines

Headquarters & Manufacturing Plant of Stainless Steel Sinks

Liti, Thessaloniki

The stainless steel sinks factory in Liti is one of the leading production units regarding production units per year, with overall capacity of 1,500,000 sinks.

It is based in a privately owned area of 200,000m² of industrial real estate, of which 30,000m² covered providing manufacturing facilities, warehousing & administration premises.

Manufacturing Plant for MDAs

Oinofyta, Athens

In a brand-new Plant, at Oinofyta, Athens, PYRAMIS started the production of ceramic and induction hobs since 2022, with the team (incl. designers & engineers) and the equipment from a former German MDA production plant, while the new Pyramis ovens are already in the development phase.

The goal with this investment was to offer our customers MDAs Designed and Made in EU.

Cookerhoods

Smooth design, minimal lines, fine quality and superior functionality are only some of the features of PYRAMIS cookerhoods. They are manufactured to offer a healthy, clean and odourless environment in the kitchen, creating the ideal conditions for everyday cooking. Their high quality as well as their variety in designs, dimensions and types ensure the right choice for your own kitchen.

Choose the right cookerhood for your kitchen!

We calculate the volume of the room in cubic meters and then we multiply it by 12 (an effective cooker hood refreshes air in the kitchen 12 times per hour).

Example:

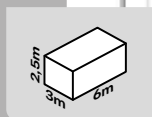

Kitchen room dimensions: **6** meters long, **3** meters wide and **2.5** meters high.

The volume of the kitchen room is equal to length x width x height:

$$6 \times 3 \times 2,5 = 45\text{m}^3.$$

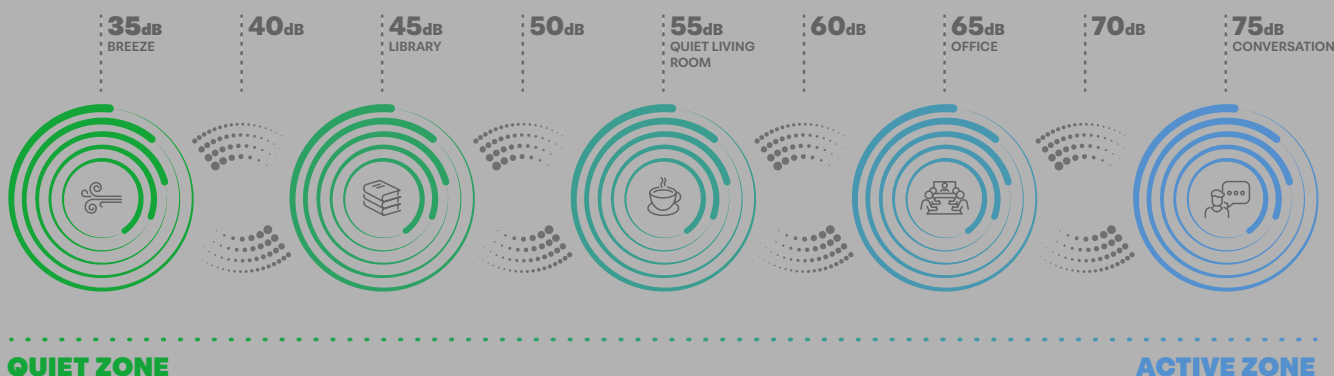

Given that the air in the kitchen should be refreshed 12 times per hour, then the extraction rate required should be $12 \times 45\text{m}^3 = 540\text{m}^3$.

So the recommended cooker hood should have extraction capacity at least $540\text{m}^3/\text{h}$.

Low noise level

Pyramis cooker hoods keep the noise levels low, creating ideal home conditions. Noise level is measured in dB and PYRAMIS cookerhoods level equals to an "office".

Installation for maximum performance

Did you know that if the cooker hood is fitted with an outlet pipe of more than 6 meters and 3 angles of 90°, its output is reduced by 50%?

By following the above simple tips, you ensure the cookerhood's maximum performance by installing it correctly!

1

Avoid connections with curves or angles.

2

Use a cylindrical drain pipe (12-15cm in diameter), smooth surface (not corrugated) for optimum vapor flow.

3

Avoid exhaust pipes longer than 5 meters.

4

The distance between the hood and the hob should be between 65cm and 75cm.

Cookerhoods

▪ Features ▪

1

Materials

Pyramis cookerhoods are offered in various materials and color combinations so that they can match your kitchen style. Glass, stainless steel or painted surfaces and their combinations are just some of the options that you can choose from.

2

Device control

Touch control, functional push, sliding or electronic buttons, ensure ease of use and excellent aesthetics.

3

Metallic filters

They protect the inner parts of the cookerhood by preventing the absorbed grease and fumes from harming the fan or the motor and add to the aesthetics of the cooker hood. They are easy to remove and can be washed by hand, or in the dishwasher.

4

Carbon filters

Carbon filters recirculate the purified air back to your kitchen. They cannot be cleaned or repaired; they can only be replaced when necessary. Their saturation depends on the level and time of use, type of cooking and the frequency that the metal filters are cleaned.

5

Lighting

The use of LED lighting ensures efficient & constant light flow, longer life cycle and energy saving.

Cookerhood functions

i

A. Air extraction

Metal filters withhold airborne grease and channel the filtered air outside through the ducting pipe.

B. Recirculating

The absorbed air is filtered through activated charcoal filters that withhold odors, channeling the purified air back to the room.

Hobs

PYRAMIS redefines and upgrades the «**MADE IN GREECE**» quality, with the new ceramic and induction hobs in its range. The sophisticated design and the multitude of types, functions and sizes, combine appropriately with the latest developments in technology and offer the perfect choice for every kitchen. Whether ceramic, induction or gas, PYRAMIS hobs guarantee efficiency and high quality in everyday life preparing your meals.

Design

Sophisticated and innovative design, inspired by the symbol of “infinity”... just like our capabilities!

Hob profiles

Hobs frameless or with inox frame, beveled finish and easy-fix clips, for easy installation, contribute to the style and aesthetics of your kitchen.

Ceramic / Induction Hobs

▪ Features ▪

1

Control

Use the high tech touch controls or rheostatic knobs to easily and safely operate your appliance.

2

Oval Zone

It is suitable for larger pots or pans, offering greater flexibility and convenience.

3

Overflow safety device

OSD turns the hob off, in case of fluid overflow on the appliance's surface while cooking, ensuring maximum safety.

4

Timer (ceramic hobs)

At the end of the desired cooking time, it notifies you audibly to turn off the hob.

5

Residual heat indicator

A red digital indicator that warns that the relevant zone is still hot.

6

Safety lock

All hob functions can be locked to prevent accidental activation or child intervention.

▪ Induction Hobs Additional Functions ▪

Bridge function

The bridge function allows you to join two cooking zones, making cooking with larger utensils easy.

Pause function

The pause function stops cooking and continues with the same settings after the reactivation.

Booster zone

Speeds up the cooking time, providing a higher power level for 5 minutes straight.

Keep warm

The Keep warm function keeps the food in constant temperature of 70 °C until serving time, while preserving its taste and freshness.

Power management

Easily set the desired power level of your device.

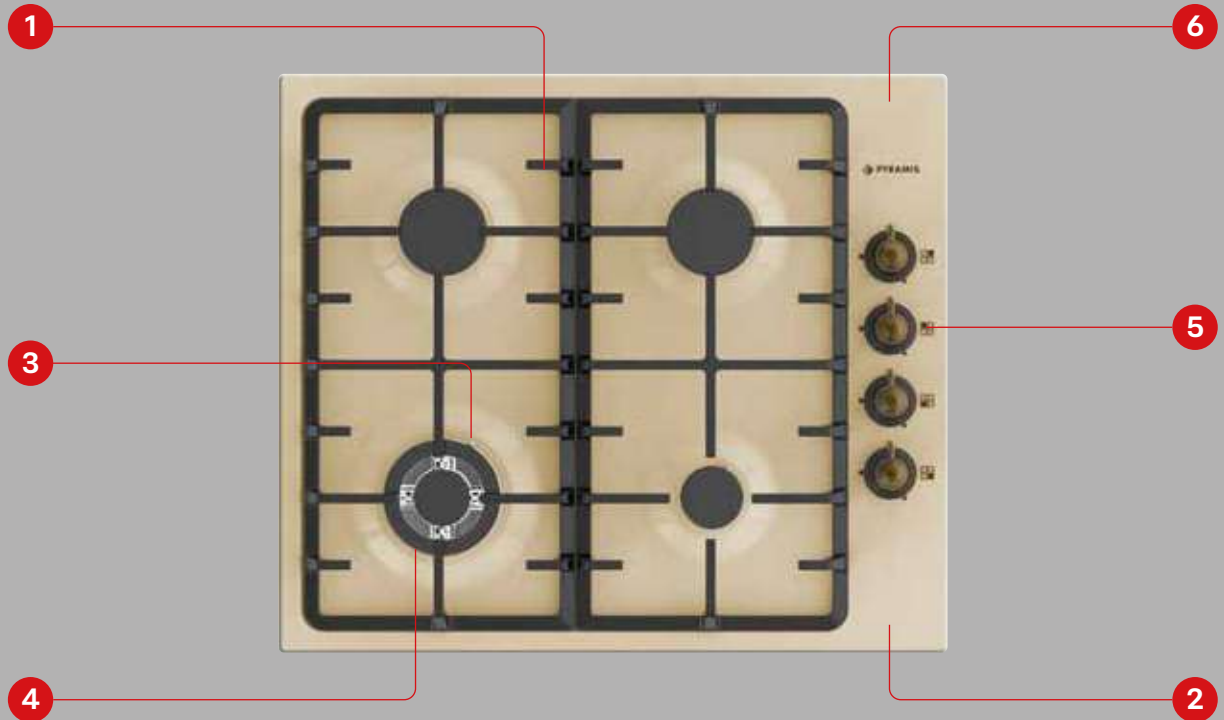

Timer

It can be used as a simple sound reminder or to automatically turn off the selected cooking zone.

Gas Hobs

▪ Features ▪

1

Cast iron pan support

PYRAMIS gas hobs have cast-iron pan support, ensuring greater safety in supporting your utensils, as well as longevity.

2

Flame failure device

The FFD system ensures that the gas flow to your hob is stopped in case the flame goes out for any reason.

3

Automatic Ignition

PYRAMIS gas hobs have automatic ignition, making it easy to activate the appliance even with one hand.

4

Large Wok Burner

It provides a stronger flame and improved energy efficiency helping you finish cooking faster.

5

Ease of handling

Ergonomic knobs ensure correct and easy operation while guaranteeing maximum safety during use.

6

Power flexibility

Gas hobs can be connected to either mains gas or petroleum gas, simply by changing the nozzles.

Abyssso: a new experience in your kitchen!

Abyssso is a unique solution for the kitchen offering an odorless environment with complete visual freedom as it combines an induction hob with an integrated hood under the worktop.

An evolution in both aesthetics and performance, blending perfect design and increased extraction capacity, starting a new era in the cooking experience.

▪ Features ▪

Power management

Allows the entire appliance to work at a specific power limit. There are 3 adjustable power limit options:
7400W (Default setting), 4500W or 3100W.

Automatic heat up function

Allows the selected power level to be reached faster.

Automatic level of suction

It is based on the power level of the induction cooking zones.

Keep warm function

Allows the maintaining of heat at a constant temperature, at an optimized power level. It is ideal to keep warm already cooked foods.

Air Outlet

Abyssso can be installed in the air recirculation mode in two ways: by outlet inside the kitchen furniture or by outlet in your kitchen area.

Plinth In

Plinth Out

Filters

The metallic filter is easily removed and cleaned even in the dishwasher. Ceramic filters are renewable for up to 5 years (depending on use). Their maintenance can be done every 2-3 months by putting them in the oven at a temperature of 200°C for 45 minutes.

Ovens

PYRAMIS ovens are designed to make cooking as easy and fast, as possible so you have more time to spend to/with what you love most. Cook with comfort and enjoy a tasty result. The smart functions of PYRAMIS ovens will meet successfully any cooking challenge you set. They are available in various combinations of functions and styles, with a large capacity of 78lt, a deep pan of 8cm and different sets of accessories. Choose the one that best suits your needs and unfold freely your creativity in the kitchen, the results will surely amaze you!

Oven control

By combining different types of knobs, touch screens, mechanical or electronic timers and automatic programs, PYRAMIS ovens ensure their easy and safe operation without sacrificing style and ergonomic design.

Ovens

▪ Features ▪

1

Soft close door

Specially designed hinges, softly and quietly close the oven door with a gentle touch, reducing vibrations and noise.

2

Door glass

The door glass is easily removable while it has an easy-to-clean coating and cleaning between the glasses becomes easy!

3

Easy to clean

Special enamel coating with a smooth surface, that doesn't absorb food residues and can be easily cleaned.

4

Side racks

They make cooking easier and ensure a longer lifespan of the enamel coating by protecting it from scratches. They are easy to remove for cleaning the oven.

5

Telescopic guides

They offer easy supervision of the cooking while making the removal of the tray, once the baking is over, piece of cake. They can be easily removed for cleaning and repositioned at the rack level of your choice.

6

Deep Tray - 8cm

The large, 8cm deep tray comfortably covers the daily needs for large quantities of food, avoiding splattering the inside of the oven. It is very easy to clean even in the dishwasher.

7

Door handles

High aesthetics, durability and ergonomic design are the key features of the new PYRAMIS oven handles.

Cooking

Multilevel baking!

The large capacity of the oven – 78Lt and the different available trays allow you to cook different kinds of food at the same time, without the risk of mixing the smells and flavors of what you are cooking.

Defrost

The Defrost program defrosts your food safely, quickly and evenly without damaging its taste and nutrients. Just place the frozen food in the middle rack of the oven, on the wire grid.

Place a pan underneath to collect all the liquids that will occur from the thawing.

3D Cooking - Airfry

Super intensive cooking function with hot air, which ensures a crispy and well-cooked meal without unnecessary fats. The combination of upper & lower heating element, grill and fan with hot air create a homogeneous heat diffusion which saves 20% in cooking time and 25% in oven preheating time.

Cooking

Big grill

More efficient baking with optimal heat distribution. Perfect cooking every time, so that the food is crispy on the outside and juicy on the inside, quickly and comfortably.

Pizza

This special function, with a baking temperature setting of up to 320 °C, was specially designed to perfectly bake pizzas, pies and similar recipes which require high temperatures for the perfect result.

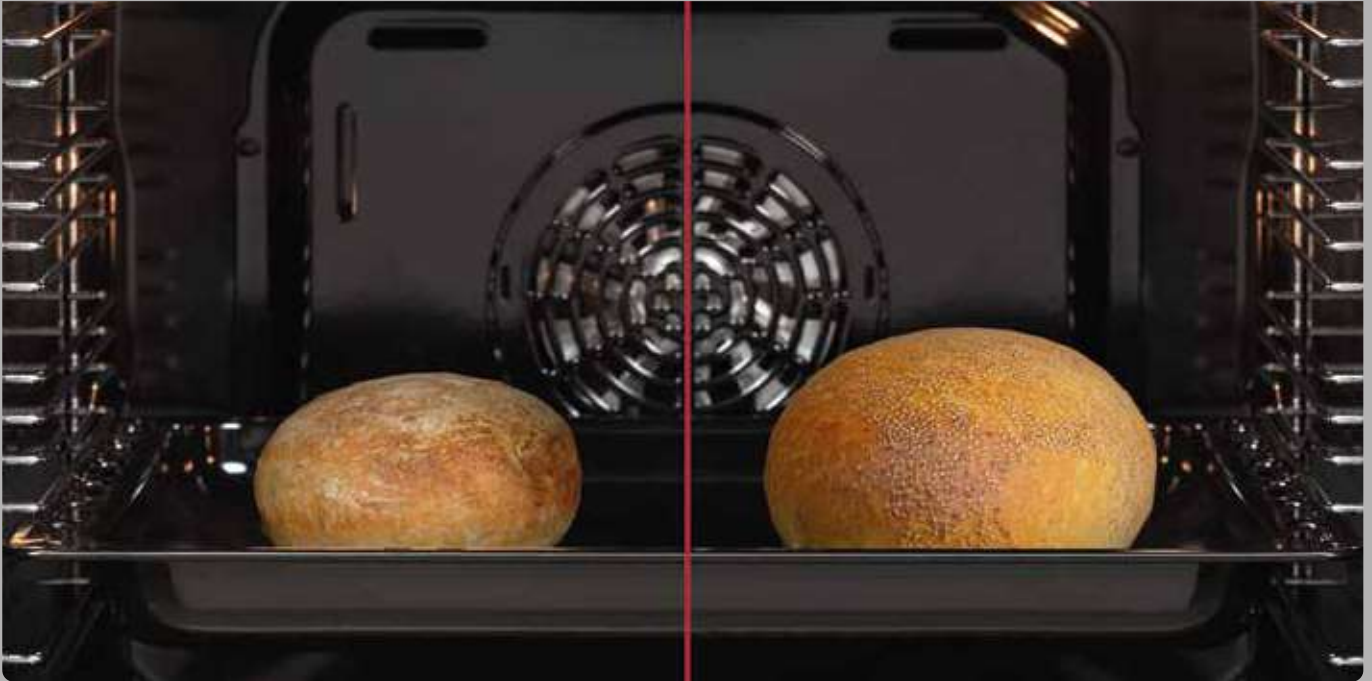

Automatic programs

With the automatic programs the cooking parameters can now be adjusted and set easily. Start cooking by simply adding the weight and type of food and pressing "start".

The only thing left for you to do is enjoy!

Steam Assisted Cooking

Steam cooking is a natural, healthy way to preserve vitamins and nutrients in food. Steam cooking keeps the food juicy on the inside and crispy on the outside.

The PYRAMIS steam oven allows you to cook a huge variety of different foods more skillfully and much faster than the classic oven.

The moisture of the steam allows the food to retain its flavor and moisture inside while forming an excellent crust on the outside. All you have to do is fill the special water tank with water and select the special program. Your food will be healthier, lighter and tastier!

Safety

Child lock

Child lock activation makes it impossible to change the cooking parameters from the touch control panel, ensuring smooth and safe operation of your oven without the risk of intervention by small children.

Doors with Active Cool system

This technology guarantees low temperatures on the outer surface of the oven door during its operation, providing maximum safety even during pyrolysis operation with indicative temperatures:

Glass: 45°C + room temperature,
Metal parts: 35°C + room temperature.

Cooling System

The ventilation system cools the oven efficiently, maintaining the appropriate temperature both around the oven (cabinets) and at the front (door), ensuring maximum safety and efficiency.

Cleaning

VapClean

With the VapClean function, cleaning the oven becomes a breeze. Place a glass of water on the base of the oven (if there is a special cavity) or on the pan you will place in the bottom of the oven and activate the VapClean function. Alternatively you can use the oven program bottom heating element with fan, for 30 minutes at 80°C. The generation of steam inside the oven will soften dried food stains and you will be able to remove them with a soft cloth.

VapClean+

VapClean+ function can only be found in the steam oven. Add 300ml of water to the water tank and activate the VapClean+.

The steam will soften the dried food stains and to remove them from the inside of the oven it will only be necessary to wipe with a soft cloth.

Pyrolysis

During the pyrolytic cleaning process the oven is heated to approximately 450 °C for 1 hour while the door is locked for safety reasons.

At this temperature, food residue turns into a thin layer of ash that can simply be wiped off with a damp cloth.

Refrigerators

PYRAMIS refrigerators not only keep the freshness of your food but also all its nutrients intact for a longer period of time. They are equipped with optimized features and functions that ensure maximum performance thanks to intelligent temperature and humidity controls as well as special environments for different foods in special cases. They have large capacities, silent operation and energy saving. Discover the one that best suits your kitchen and eating habits through a wide variety of types and dimensions.

▪ Functions ▪

Vacation

When you are on vacation and your fridge is almost empty, the vacation mode is the best choice. The fridge's temperature is automatically set to 17 °C, keeping the chamber cool but saving energy, while the freezer compartment operates under the default settings.

Super Freeze

If you are about to load up your refrigerator, it is advised to set it, 24 hours prior, to Super Freezing Mode. This way the freezer temperature will be set to -25 °C, preparing to facilitate the fresh goods without disturbing the already frozen ones.

2 °C

Power Cooling

In this mode the temperature of the fridge compartment will cool down very quickly until it reaches 2 °C and then it will return to its initial temperature settings.

ECO

In this mode the refrigerator's temperature is automatically set to 5 °C in the fridge and -18 °C in the freezer compartment, ensuring the lesser energy consumption and noise.

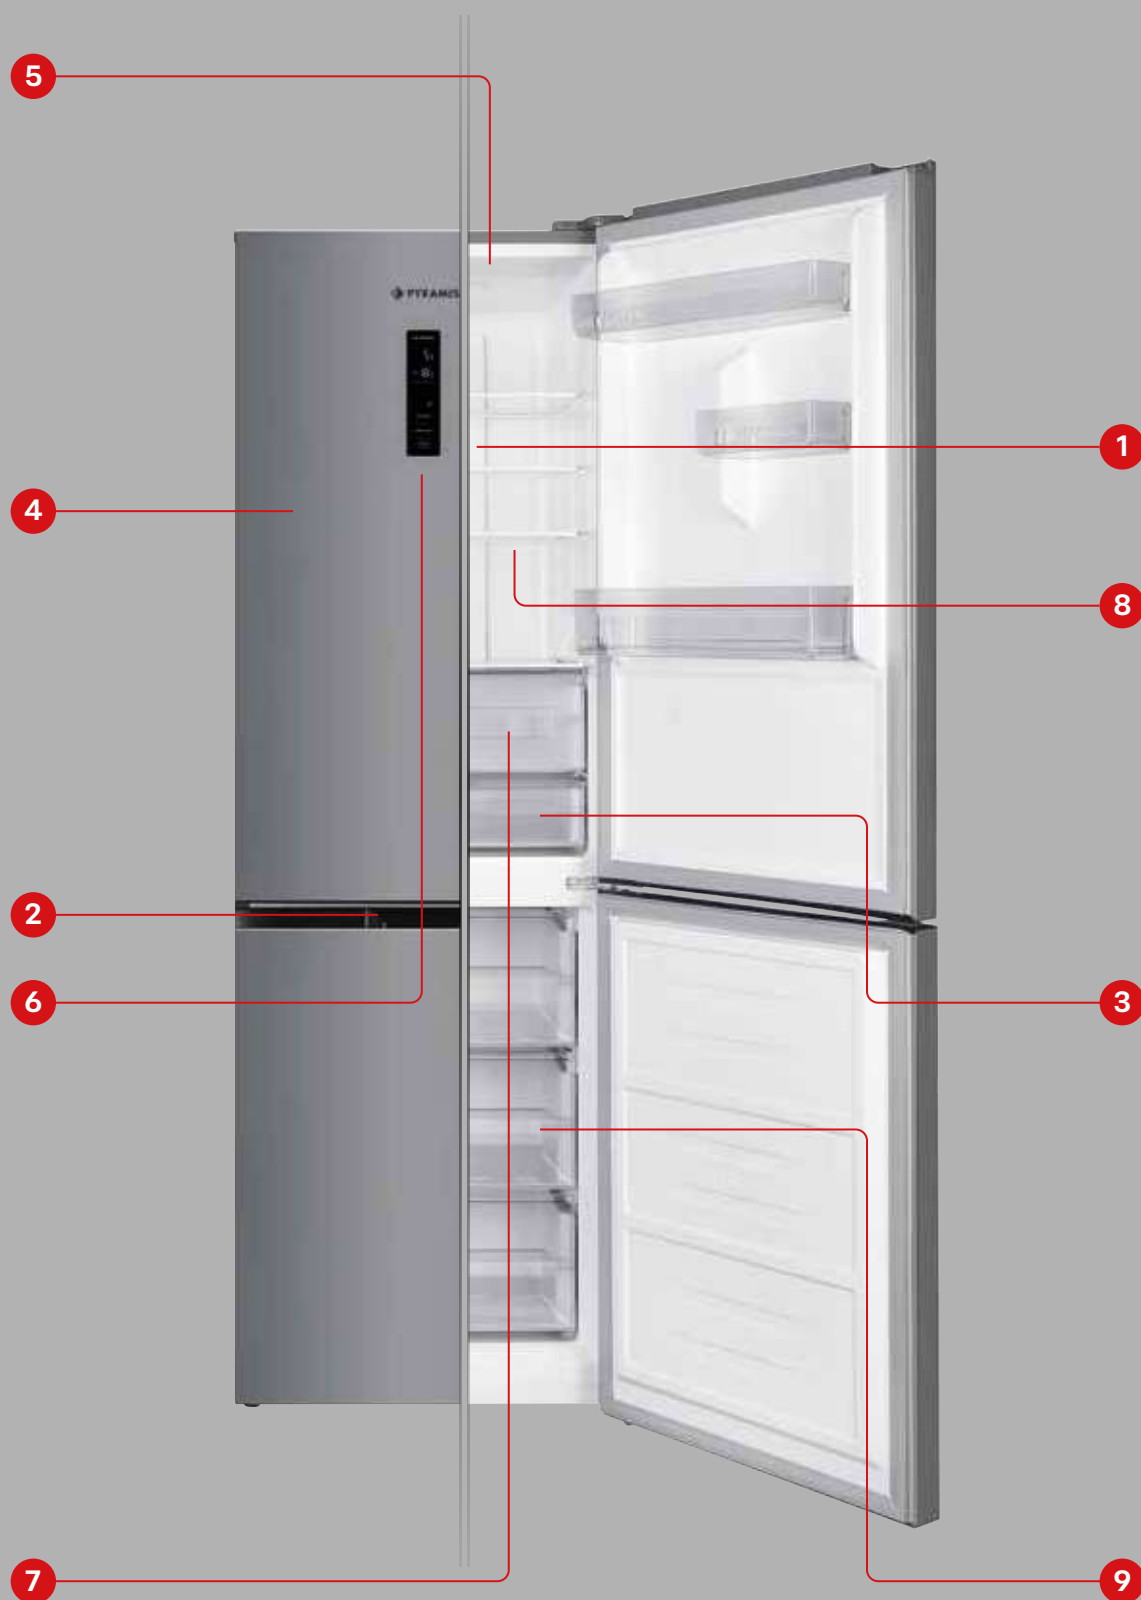

SMART

Smart

In this mode the refrigerator's temperature is set automatically according to the ambient temperature around the appliance.

Refrigerators

▪ Features ▪

1

Inverter Compressor / No-Frost

Inverter technology improves energy efficiency, combined with Multi-Air ensures an even temperature throughout the cavities.

2

Handle

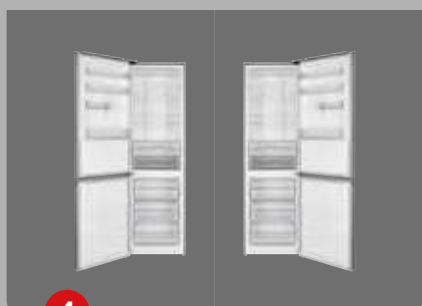

Cleverly designed ergonomic handles that elevate the minimal design and facilitate daily use.

3

Fresh converter drawer

This special, independent drawer can be set to a lower temperature level and be used as a chiller to perfectly keep meat or fish, or it can be used as a crisper to store fruits & vegetables.

4

Easy Door Reversibility

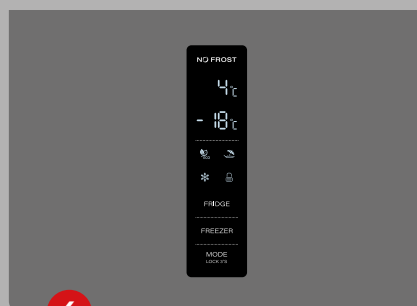

Left or right door-opening conversion is made easy by design to quickly adapt to all kitchen layouts.

5

LED Internal Lighting

Easier on your eyes, and more pleasing. The matte "Sky" anti-glare LED light provides for brighter lighting throughout the entire internal cavity.

6

Soft Touch Digital Display

A clear, precise and user-friendly interface to set the fridge and freezer temperature separately. Everything is easily under control with the soft touch display.

7

Crisper with Humidity Control

The roomy and sturdy crisper compartment is larger than the industry average level and can be slid effortlessly in and out. Furthermore, with the slider above it, you can adjust the humidity level according to the type of food you keep inside it.

8

Shelves & drawers

Easy to clean glass shelves with a feeling of luxury inside the refrigerator, and transparent shelves and drawers you are always aware of the contents of your refrigerator.

9

No-Fall Freezer Drawers

The large, steadfast freezer drawers have been designed for easy use, and will remain leveled for safer and more comfortable loading and unloading.

Dishwashers

PYRAMIS dishwashers, secure more free quality time for you by cleaning your dishes perfectly, while at the same time respect the environment, helping you save water and energy without compromising on performance. They have flexible baskets, smart programs, maximum safety during their use and easily adapt to your everyday life, making it simply... better.

▪ Programs ▪

Prewash

For pans and dishes that require extra washing.

Quick 30' (40°C)

For dishes with light dirt.

Delicate (40°C)

For dishes or glasses that require standard cleaning.

ECO (50°C)

For dishes with normal dirt, washed immediately after use.

Super 50' (65°C)

50 min program for very dirty pans & dishes.

Intensive (65°C)

For dishes with dried-on residues

Hygiene (70°C)

Hygienic dish washing for very dirty dishes.

Dishwashers

▪ Features ▪

1

Active drying system

Active drying system improves the effects during drying operation.

2

Aqua stop system

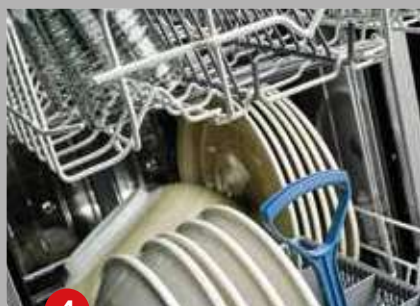

The aqua stop system automatically shuts off water supply while the pump empties the water inside the dishwasher. This allows you to leave the washing machine on even when you are away, or you sleep.

3

Multiple detergent choice

PYRAMIS dishwashers are automatically adjusted in various detergents: liquid, powder, tablet 3 in 1, without the need to select a special function.

4

Capacity

10 or 12 place settings (depending on the model) can be washed at the same time but even large utensils, such as pots, pans, etc.

5

Flexibility

The lower basket has movable elements and adaptable placements for easy loading, ensuring the perfect washing and drying effect.

6

Salt & dishwasher polish light indicator

A light indicator notifies you that you must add salt or polish so that the results are always great.
