Expertise Quality Innovation

Pyramis Metallourgia A.E. is a Greek multinational company producing and supplying integrated kitchen and bathroom solutions. It was founded in 1960 by Alexandros Bakatselos and is based in Thessaloniki, in Northern Greece, on a privately owned area of 200,000 m². With 60 years of expertise, PYRAMIS is considered among the leading producers of stainless steel, granite and synthetic sinks.

PYRAMIS operates one of the biggest stainless steel sinks' production units globally, with an annual capacity of more than 1.500.000 pieces.

In 2010, Nikolaos Bakatselos took over as Managing Director of Pyramis Metallourgia A.E.

Alexandros Bakatselos,
Founder of Pyramis Metallourgia A.E.

"Much has changed since 1960, however, some things have remained the same: our commitment to our customers which is our driving force, our foundations built on integrity and team behavior, our drive for quality and our passion that takes our products around the globe".

*Nikolaos Bakatselos,
CEO of Pyramis Metallourgia A.E*

Technological Excellence

Pyramis Metallourgia A.E. is located in Liti Thessalonikis, where its highly automated production facilities of stainless steel sinks, distribution center and head offices are based. In 2013, the new granite and synthetic sinks production facility started its operations with an annual capacity of 170.000 sinks.

The evolutionary course of PYRAMIS is due to the continuous investments in both technological and mechanical equipment, to the successful development and launch of new innovative products and to the know-how and specialization of its human resources.

Liti, 1974

Kilkis, 2013

A strong footprint worldwide

PYRAMIS export sales account for more than 97% of the production with direct exports in 68 countries and indirect sales in more than 82, in 5 continents. PYRAMIS products are installed in more than 80 million homes around the globe, making kitchens and bathrooms beautiful and functional.

It has 9 subsidiaries with sales offices and warehouses in: Poland, United Kingdom, Germany, Romania, Italy, Russia, Bulgaria, United Arab Emirates and Czechia, while it employs more than 650 people.

PYRAMIS has managed to become a multinational group of companies conquering the global markets, while remaining true to its mission of a company with “human face”, adding value to its customers’ lives.

Kitchen Solutions

Kitchen is the room where we share beautiful moments and smiles with our loved ones daily. Therefore, it needs to be stylish, functional and should follow high quality and safety standards.

In PYRAMIS we offer integrated solutions, from contemporary kitchen sinks and mixers, to high quality electrical appliances, distinguished for both their design and quality. Thus, our kitchen area becomes truly unique.

Kitchen Products

- Stainless Steel Sinks
- Pyragranite Sinks
- Pyratek Sinks
- Fibertek Sinks

- Kitchen Mixers

- Cookerhoods
- Ovens
- Hobs
- Dishwashers
- Refrigerators

- Small Domestic Appliances
- Cookware

- Project Fittings - Pantries

Bathroom Solutions

The PYRAMIS Bathroom Collection with its minimal design and ergonomical approach transforms the bathroom into a space of high aesthetics and great functionality.

The PYRAMIS bathroom mixers and shower systems of high quality and design, provide a total bathroom experience while the wide range of solar systems and water heaters - boilers, cover the requirements of all potential customers.

PYRAMIS Group in Numbers

60 Years of Expertise

Top leading stainless steel sinks producer
Worldwide.

650 Employees

For PYRAMIS Group the most important asset is
human capital. More than 650 employees in 10
countries.

9 Subsidiaries

In Poland, Romania, Bulgaria, Germany, Russia,
Czech Republic, United Kingdom, Italy, United Arab
Emirates.

97% Exports

International sales account for more than 85% of
total company's turnover, with almost 97% of its
production exported all over the world.

Presence in 82 Countries

Brand presence and Direct Sales in 68 countries
worldwide, while PYRAMIS products are
distributed in 82 countries worldwide

1,67M. Sinks

Production capacity of 1,500,000 Stainless Steel
Sinks & more than 170,000 Composite Sinks
annually.

5.000 Points of Sale

Wide distribution network worldwide. 2.000 points of sale in Greece, with leading position in the Greek market.

Strategic Partnerships

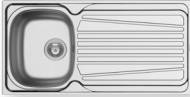

Long terms partnerships, with strategic customers, distributors and partners around the globe.

Stainless Steel Sinks

Stainless Steel Finish

PYRAMIS uses traditionally the best quality performance Stainless Steel material AISI 304. This type of stainless steel contains a significant amount of chromium, and sufficient nickel to «stabilise» the microstructure, that gives to these steel goods formability and ductility. The typical composition is 18% chromium and 10% nickel and this makes PYRAMIS' Stainless Steel Sinks extremely resistant to rust or corrosion in normal household conditions.

A variety of stainless steel finishes includes polished, satin, brushed and linen.

PYRAMIS introduces PVD processing in ASTRIS COLORA series.

Characteristics

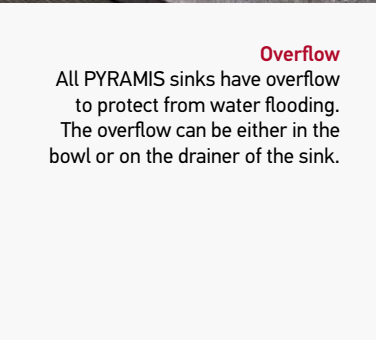

Accessories

Make your daily work in the kitchen easier by choosing the right accessories for your sink.

Waste valves

The diameter of the outflow defines the type of waste valve. Sinks are available with 60mm, 92mm diameter or square outflow (depending on the model).

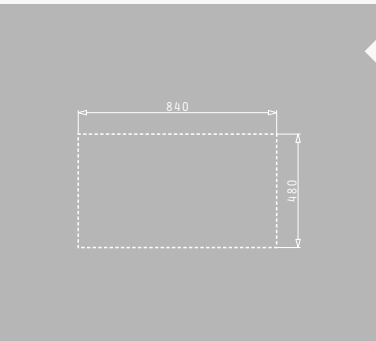

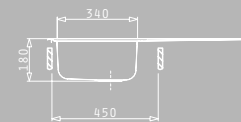

Overflow

All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

Minimum base unit

The stated size refers to the minimum size of base unit required to fit the sink bowl(s), overflow, waste pipework & mixer tap.

Cut out drawing

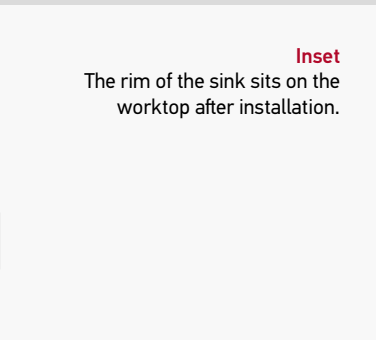

Is a guide which helps the accurate cutting of the worktop. It includes the cutout length and width of the relevant model for inset, undermount or flushmount fitting. It is suggested to make a cut out test by installing the sink into a low-cost surface before proceeding with the cutting of the final surface.

Factory fitted seal

PYRAMIS Stainless Steel Sinks for inset installation are provided with a preinstalled sealant of polyurethane underneath the sink, thus, the installation of an inset sink becomes much easier and friendlier since the sealant that is already installed provides time-saving compared to other sealing methods. Look out for the model in the catalogue with the **EASY FIX™** logo.

Installation profiles

Inset

The rim of the sink sits on the worktop after installation.

Undermount

The rim of the sink is placed underneath the worktop.

Flushmount

The rim of the sink is installed at exactly the same level with the worktop.

Wall mounted

Wall mounted sinks for limited spaces.

Onset

3 Sides Down: Three of the four sides are folded down and the fourth, which is located on the back edge of the sink, is folded up in order to create an upstand against the wall.

4 Sides Down: The onset sink is formatted in a way that all four sides are folded down.

Pyragranite Sinks

Composition - Colors

Pyragranite sinks consist of 80% natural quartz (silica), while the remaining 20% of the mixture consists of resins and enhancing substances. You can find the PYRAMIS Pyragranite Sinks in 6 different colors:

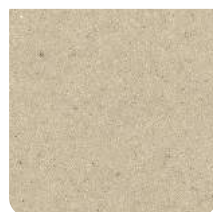

SNOW

CARBON

BEIGE

MOCHA

CHOCOLATE

IRON GREY

Characteristics

Accessories

Enhance your daily activities in the kitchen by choosing the appropriate accessories for your sink.

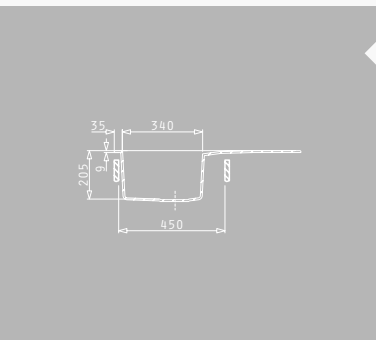

Waste fittings

Underneath each model you can find included and other suitable valves and siphons.

Overflow
All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

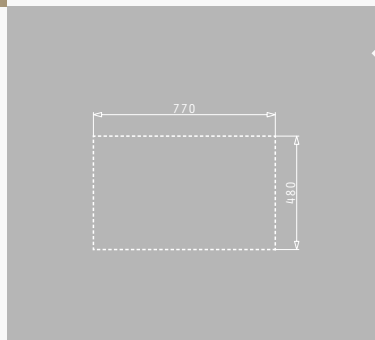

Safety
Mold, stains and unpleasant smells are often caused by bacteria. Pyragranite homogenous, without pores, surface prevents bacteria accumulation making your sink cleaner and safer.

Minimum base unit

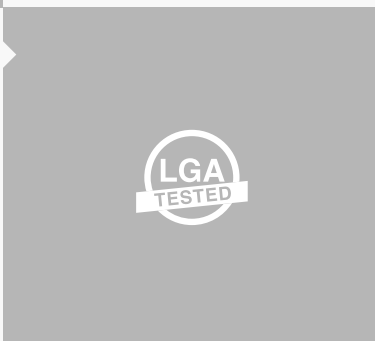

The stated size refers to the minimum sized base unit required to fit the sink bowl(s), overflow, waste pipework & mixer tap.

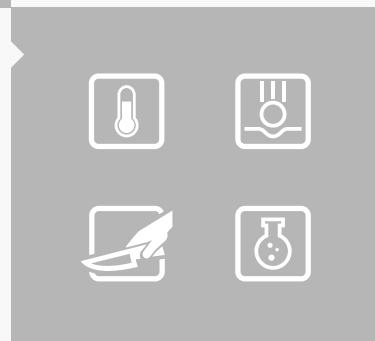

Cut-out drawing

Is a detailed guide which helps the accurate cutting of the worktop. It includes the cut-out length, width and corner radius of the relevant model for inset, undermount or flushmount fitting.

Certifications
Apart from the strict quality controls carried out by PYRAMIS, Pyragranite sinks are also certified by the LGA Institute, which reassures that the sinks comply with the most demanding quality standards in regards with their durability and hygiene.

Features
Pyragranite sinks show high heat resistance even after contact with an object at 200°C. They can resist an impact of an 1kg object dropped from a height of 70cm. They also exhibit high hardness qualities, thus providing increased anti-scratch behavior. They do not discolor even if they come in contact with domestic cleaning kitchen products.

Installation types

Inset

The rim of the sink sits on the worktop after installation.

Undermount

The rim of the sink is placed underneath the worktop.

Flushmount

The rim of the sink is installed at exactly the same level with the worktop.

GRAPHITE

Characteristics

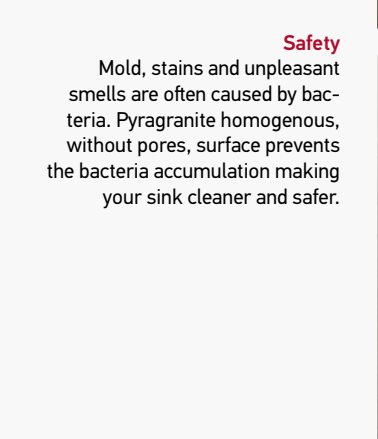

Waste fittings

Underneath each model you can find included and other suitable valves and siphons.

Overflow

All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

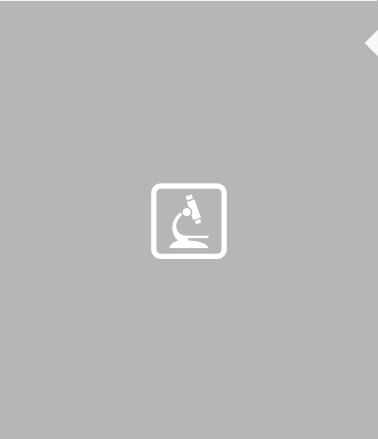

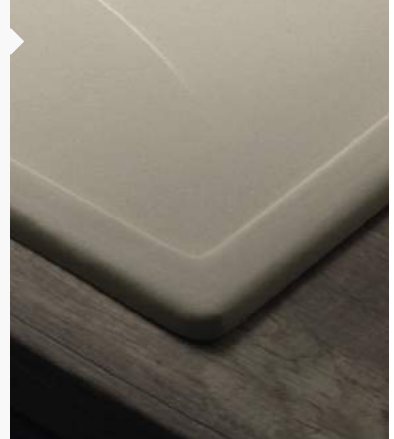

Safety

Mold, stains and unpleasant smells are often caused by bacteria. Pyragranite homogenous, without pores, surface prevents the bacteria accumulation making your sink cleaner and safer.

Inset Installation

The rim of the sink after installation appears on the worktop.

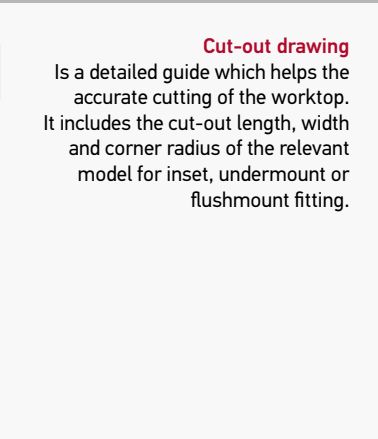

Composition

Pyratek sinks consist of 70% calcium carbonate (CaCO₃), while the remaining 30% of the mixture consists of resins and other substances, forming a solid material.

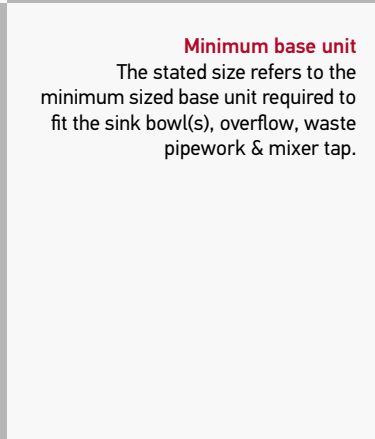

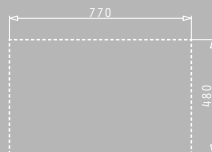

Features

Pyratek Sinks are characterized by thermal shock resistance, even after contact with object up to 180°C. They have impact resistance even after throwing an object of 2kg from 20cm height and strong mechanical properties that enhance their anti-scratch behavior. They appear high resistance to mild stains like red wine or coffee.

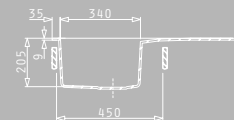

Cut-out drawing

Is a detailed guide which helps the accurate cutting of the worktop. It includes the cut-out length, width and corner radius of the relevant model for inset, undermount or flushmount fitting.

Minimum base unit

The stated size refers to the minimum sized base unit required to fit the sink bowl(s), overflow, waste pipework & mixer tap.

PYRATEK SINKS

Fibertek Sinks

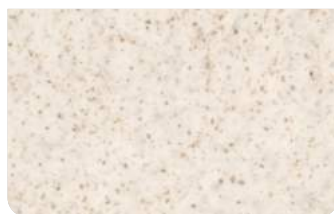

Colors

Sheet Moulding Compound (SMC) is an innovative compression process of a reinforced molding. It consists of fiber-based glass mixed with polyester and other resins. You can find the PYRAMIS Fibertek Sinks in 4 different colors:

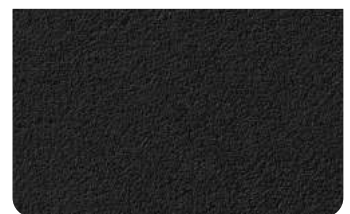

WHITE

BEIGE

GREY

BLACK

Characteristics

Waste fittings
Underneath each model you can find included and other suitable valves and siphons.

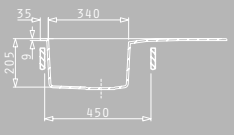

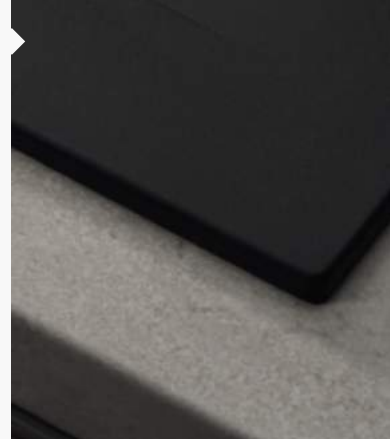

Overflow
All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

Safety
Mold, stains and unpleasant smells are often caused by bacteria. Fibertek homogenous, without pores, surface prevents the bacteria accumulation making your sink cleaner and safer.

Inset Installation
The rim of the sink after installation appears on the worktop.

Minimum base unit
The stated size refers to the minimum sized base unit required to fit the sink bowl(s), overflow, waste pipework & mixer tap.

Cut-out drawing
Is a detailed guide which helps the accurate cutting of the worktop. It includes the cut-out length, width and corner radius of the relevant model for inset, undermount or flushmount fitting.

Features
Fibertek Sinks appear to have chemical resistance to strong cleaning chemicals, high impact impedance, along with excellent temperature and fire resistance. They are easy to be cleaned and suitable for all types of work surface (wood, plastic, marble, etc.)

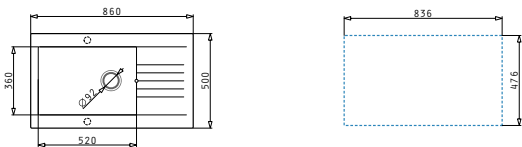

Certifications
Subjected to tests throughout the manufacturing process and validated in compliance with EN13310 standard.

PYRAMIS

Characteristics

1. Cartridge

Kerox mechanisms, from the leading company in its field, ACS certified, with ceramic discs, and resistance up to 500.000 cycles (ASME A II2 I8 IM, EN 817). New type of cartridge that makes it possible to optimize consumption, avoid useless energy overloads and reduces noise significantly (Sound Free).

2. Aerator

Air Force aerators with flow limiters, small devices installed to the tap, which, by mixing water with air, allow up to 30% water saving, while obtaining a better flow jet (WRAS certified).

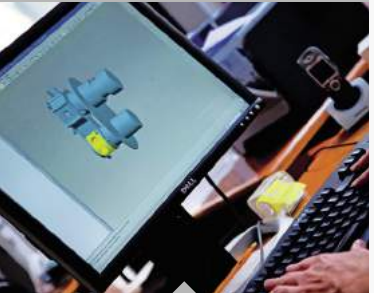

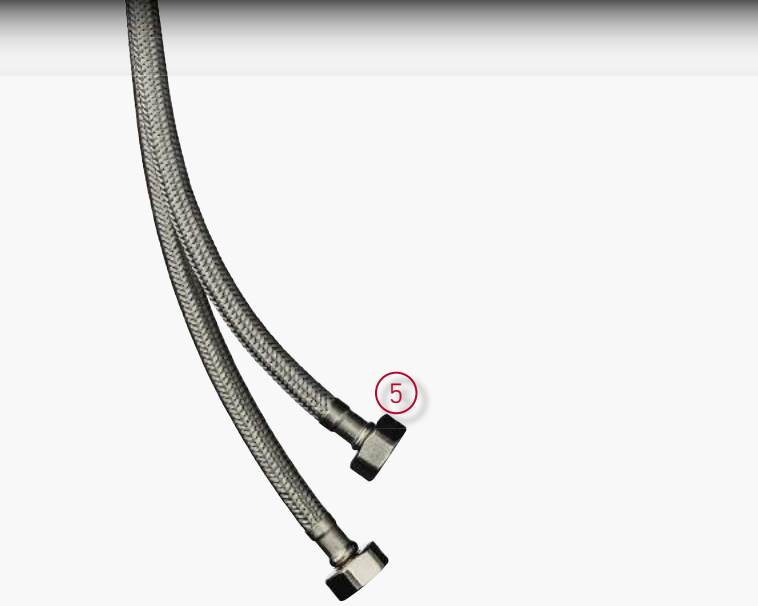

3. Certified Raw Material

Brass alloy of quality and composition in compliance with the highest international standards, and low lead levels according to the European Directives EN 1982:2000, EN 12165:99 and EN 12164:01 (Lead Approved).

4. Galvanization – Pure Water Process

An innovative and pioneering galvanization method that prevents the leaching of toxic metals, such as lead and nickel, in drinking water by Pure Water Process (EN 248).

5. Hoses – Components

Environmental friendly components made of non-toxic material that do not affect the taste or scent of water, with excellent mechanical properties, and certified according to the international quality standards NSF, KTW, DVGW (Scent Free, Taste Free).

6. Painting-Chroming

Epoxy painting, of more than 20 micron thickness and resistance to saline-spray tests of more than 300 hours.

ECOLINE KITCHEN MIXERS

Bathroom Mixers

Characteristics

1. Ease of Installation

Thanks to Pyramis' mixers' fixation systems, the mixers are being installed in a more easy, fast and economic way. The installation kit, made of stainless steel, permits fast and perfect application of the mixer in the center of the basin tap hole, in just one move.

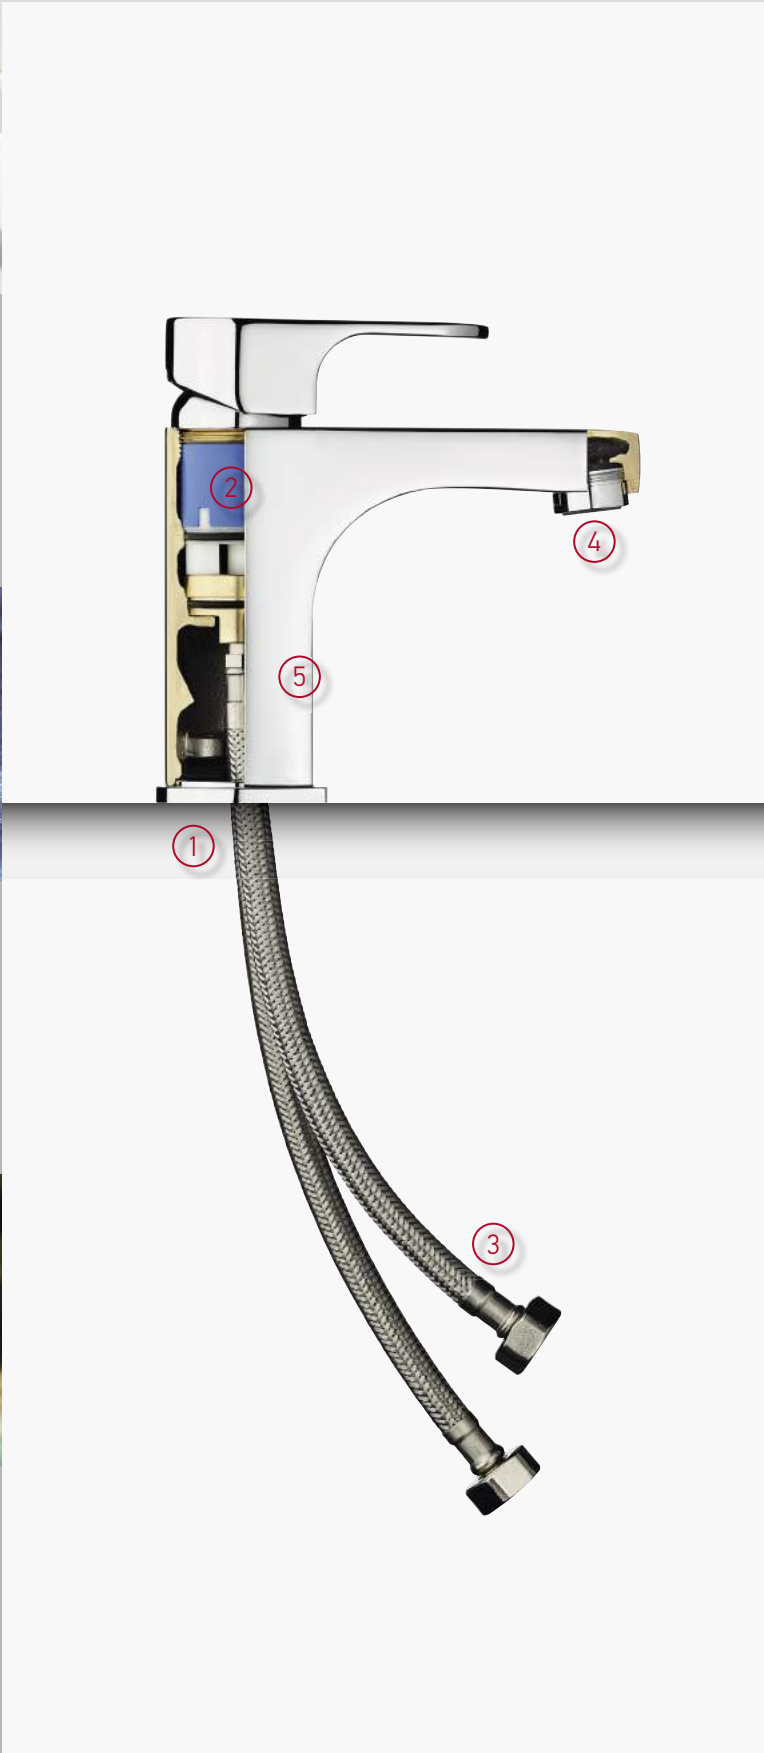

3. Security

The stainless steel flexible hoses and the water supply components are manufactured from certified non-toxic materials, offering safety to the user, and 'Clean water' free from odor or taste.

5. Quality

All Pyramis mixers are produced by certified raw materials. Brass alloy composition in accordance with the specifications of international safety and quality standards (Lead approved).

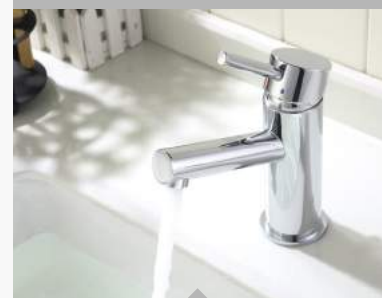

2. Lifetime

Pyramis mixers are equipped with certified cartridges, following international standards, providing them with lifetime up to 500,000 uses.

4. Water saving

Selected Pyramis mixers are equipped with a flow regulator, which is integrated at the tap nozzle, offering a flow of 6 liters / minute at 3 bars of pressure and saving water up to 50%.

6. Guarantee

All Pyramis branded bathroom mixers have 5 years quality guarantee, subject to proper use and maintenance. All Pyramis Ecoline branded mixers have 2 years guarantee.

Cookerhoods

Choose the right cookerhood for your kitchen!

We calculate the volume of the room in cubic meters and then we multiply it by 12. (An effective cooker hood refreshes air in the kitchen 12 times per hour).

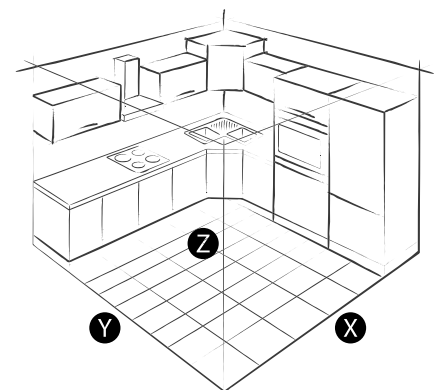

Example:

Kitchen room dimensions: 6 meters long, 3 meters wide and 2.5 meters high.

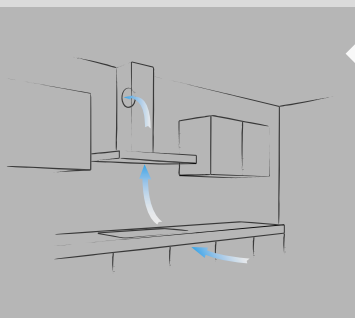

The volume of the kitchen room is equal to length x width x height: $6 \times 3 \times 2.5 = 45\text{m}^3$.

Given that the air in the kitchen should be refreshed 12 times per hour, then the extraction rate required should be $12 \times 45\text{m}^3 = 540\text{m}^3$.

So the recommended cooker hood should have extraction capacity at least $540\text{m}^3/\text{h}$.

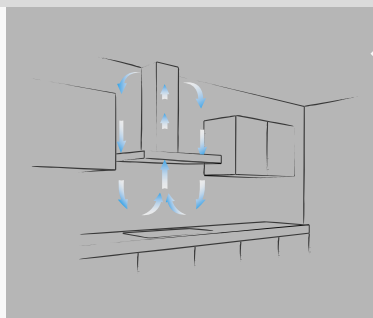

Functions

Air extraction

Metal filters withhold airborne grease and channel the filtered air outside through the ducting pipe.

Recirculating

The absorbed air is filtered through activated charcoal filters that withhold odors, channeling the purified air back to the room.

Features

Control panel options

The choices vary according to each model. Touch control, functional push buttons or electronic, ensure ease of use and excellent aesthetics.

Illumination

Halogen and LED lighting ensures high & constant light flow, longer life cycle and energy saving.

Metal filters

They protect the inner parts of the cookerhood by preventing the absorbed grease and fumes from harming the fan or the motor and add to the aesthetics of the cooker hood. They are easy to remove from their casings and can be washed by hand, or in the dishwasher.

Carbon filters

Thanks to the activated charcoal, charcoal filters recirculate the purified air back to your kitchen. They cannot be cleaned or repaired; they can only be replaced when necessary. Their saturation depends on the level and time of use, type of cooking and the frequency that the metal filters are cleaned.

Installation for maximum performance

1 Use a cylindrical drain pipe (12-15 cm in diameter), smooth surface (not corrugated) for optimum vapor flow.

2 Avoid exhaust pipes longer than 5 meters.

3 Avoid connections with curves or angles.

4 The distance between the hood and the hob should be as indicated in the manual.

5 For example, if the cooker hood is fitted with an outlet pipe of more than 6 meters and 3 angles of 90°, its output is reduced by 50%.

1

Features

Touch Control
A simple touch on the screen is more than enough to operate your oven easily & quickly.

Pop-up Knobs
For safety and ergonomics.

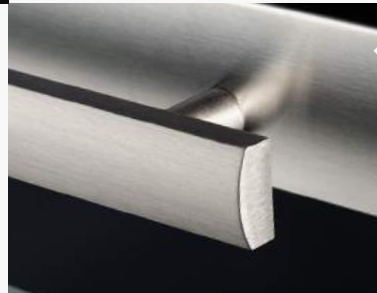

Accessories & Fittings
PYRAMIS ovens are equipped with telescopic runners, side racks, rack & tray.

Removable inner glass
Designed to ensure absolute heat isolation, thus, better energy and cost efficiency. It is easy to remove and clean.

Digital Auto Programmer
Automatic multi-functioning programming at pre-determined timing.

Anti-Spot Treatment
A special coat on the outer surface, keeping the ovens spotlessly clean.

Energy Class
PYRAMIS ovens are classified in energy class A in accordance with the standards of the European Union, maintaining the power consumption at low levels in respect to cost savings & protecting the environment.

Cooling Fan
All PYRAMIS ovens have a cooling fan system that cools the casing of the oven while cooking.

Easy to Clean
A special formula on the inner cavity of the oven prevents any food splatters from sticking, making cleaning easier.

Digital End-Cooling Programmer
It allows the ovens to switch off at the pre-set desired time.

Analogue Clock With End-Cooking Programmer
An analogue clock that can be programmed to switch off cooking.

Minute Minder
Notifies the user at the end of cooking time without switching off the oven.

Hobs

Profiles

INOX FRAME

FRAMELESS

BEVELED

Features

Touch controls
Ease of use by a simple touch.

Rheostatic buttons
Adjusting simply & easily the cooking temperature.

Timer
An electronic timer that automatically terminates the operation of the hob at the end of the desired cooking time.

Rapid heating
This function offers a fast preheat to the selected hob for maximum efficiency.

Electronic Ignition (gas burners)
Immediate ignition when turning the knob.

Booster zone (induction hob)
Speeds up the cooking time by applying a higher level of heating (5min), offering more intense and rapid cooking.

Residual heat indicator
A red digital indicator that warns that the hob is still hot.

Safety lock
All hob functions can be locked to ensure that no power is supplied to the hob, preventing accidental activation or child intervention.

Overflow safety device
It locks and switches the hob off, if any fluids should overflow on to the hob's surface.

Safety valve (gas burners)
In case the flame is off, gas flow is automatically cut-off.

OVENS
HOBS

Induction hob

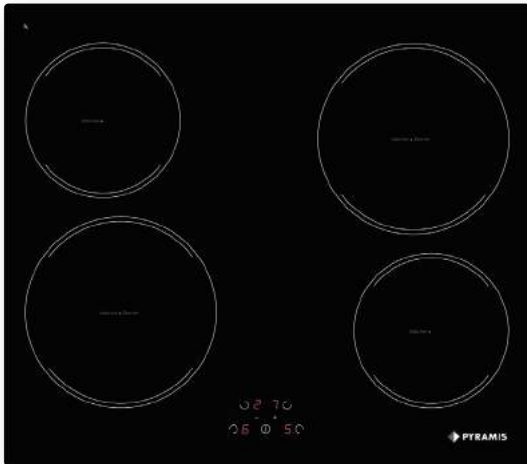

The induction hob is based on the natural phenomenon of induction, which converts electromagnetic energy into heat. When an electric current is activated, inductors beneath the hob's surface react when a ferrous pan is situated above. The heat is produced directly into the cookware.

Thus the boiling time can be reduced up to 50% in comparison to conventional electro-ceramic hobs and therefore cost and energy can be satisfactorily saved. Also, induction hobs are very easy to clean because any food splatters never burn on to the cool surface, so are very easily wiped off.

Dishwashers

Features

Active drying system
Active drying system improves the efficiency of the drying process.

Aqua stop system
It protects your machine from leakages of water or damages to the interior pipes. Especially necessary for built-in models in order to secure your kitchen from flooding.

Multiple choice of detergent
All PYRAMIS dishwashers can accommodate all types of tablets or dust detergent for superior washing results.

Ceiling spray arm
This function offers better dishwashing on the upper basket.

Digital programming
Multiple modes completely cover the most demanding needs making them an excellent choice.

Energy efficiency class
PYRAMIS dishwashers are classified as energy class A+, maintaining the power consumption at low levels.

Program Functions

Prewash
Pans and dishes that require extra washing.

Quick 30' (40°C)
Dishes with light dirt.

Delicate (40°C)
Dishes or glasses that require standard cleaning.

eco

ECO (50°C)
Dishes with normal dirt, washed immediately after use.

Super 50' (65°C)
Very dirty pans and dishes, even dried-on dirt.

Intensive (65°C)
Normally soiled pans and dishes, including dried-on residues.

Hygiene (70°C)
Hygienic dish washing for very dirty dishes.

DISHWASHERS
REFRIGERATORS

Refrigerators

Features

Freezer & refrigerator thermostats
The temperature inside the freezer and the refrigerator is very easy to control simply by adjusting the relevant thermostat at the desired level from 1-5. For the most efficient function of the fridge it is suggested to use levels 2-4 according to seasonal variations and your requirements.

No Frost
No Frost technology saves time as you never need to manually defrost your fridge. Defrosting takes place automatically through the constant circulation of cold air, inside the freezer and the refrigerator compartment. In this way the humidity is kept in the ideal level, for food preservation.

Quality Assurance
Certified devices for both their operation and their materials according to the latest European standards.

Cooling & climate rating
Four-star cooling and normal climate classes guarantee the proper operation of the appliance and proper food maintenance.

Environmentally safe
The coolant used in PYRAMIS refrigerators is isobutane (R 600a). The refrigerant gas includes no harmful chemicals and is free of CFC.

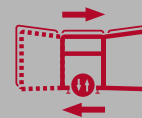

Silent function
All Pyramis refrigerators have maximum noise level of 45dB, ensuring that your kitchen is always peaceful.

Energy efficiency class
Pyramis refrigerators are A+ energy efficient in accordance to the standards of the European Union, maintaining the power consumption at low levels.

Reversible door & adjustable legs
PYRAMIS refrigerators' doors feature by default a clockwise opening. However this can be changed easily and quickly. Furthermore the adjustment of the front feet ensures the flatness of the device in every room.

Vegetable drawer
For easy and effective storage of fresh fruit and vegetables.

Glass shelves
Refrigerators have glass shelves that upgrading the product and ensuring a healthier approach to your food. They are easy to clean and resistant to long-term use.

Solar Systems

Panel

- 1 The hydroskeleton consists of heavy type copper tubes and ensures maximum efficiency.
- 2 Low-conductivity mineral wool insulation, 40mm thick.
- 3 Back panel made of aluminum and galvanized sheet metal, 0.5mm thick.
- 4 The security glass panel, 3.2mm thick, ensures maximum solar permeability $\tau=92\%$ and endurance to time and weather conditions.
- 5 Special sealing tape to adjust the glass panel on the aluminum frame minimizing any thermal loses.
- 6 Aluminum frame with double walls which offer extra insulation and mechanical endurance.
- 7 Thermal liquid (propylene glycol) which offer extra protection from freezing, water salts and oxidation.

100kg+

Security glass panel which can stand weight of 100+kg

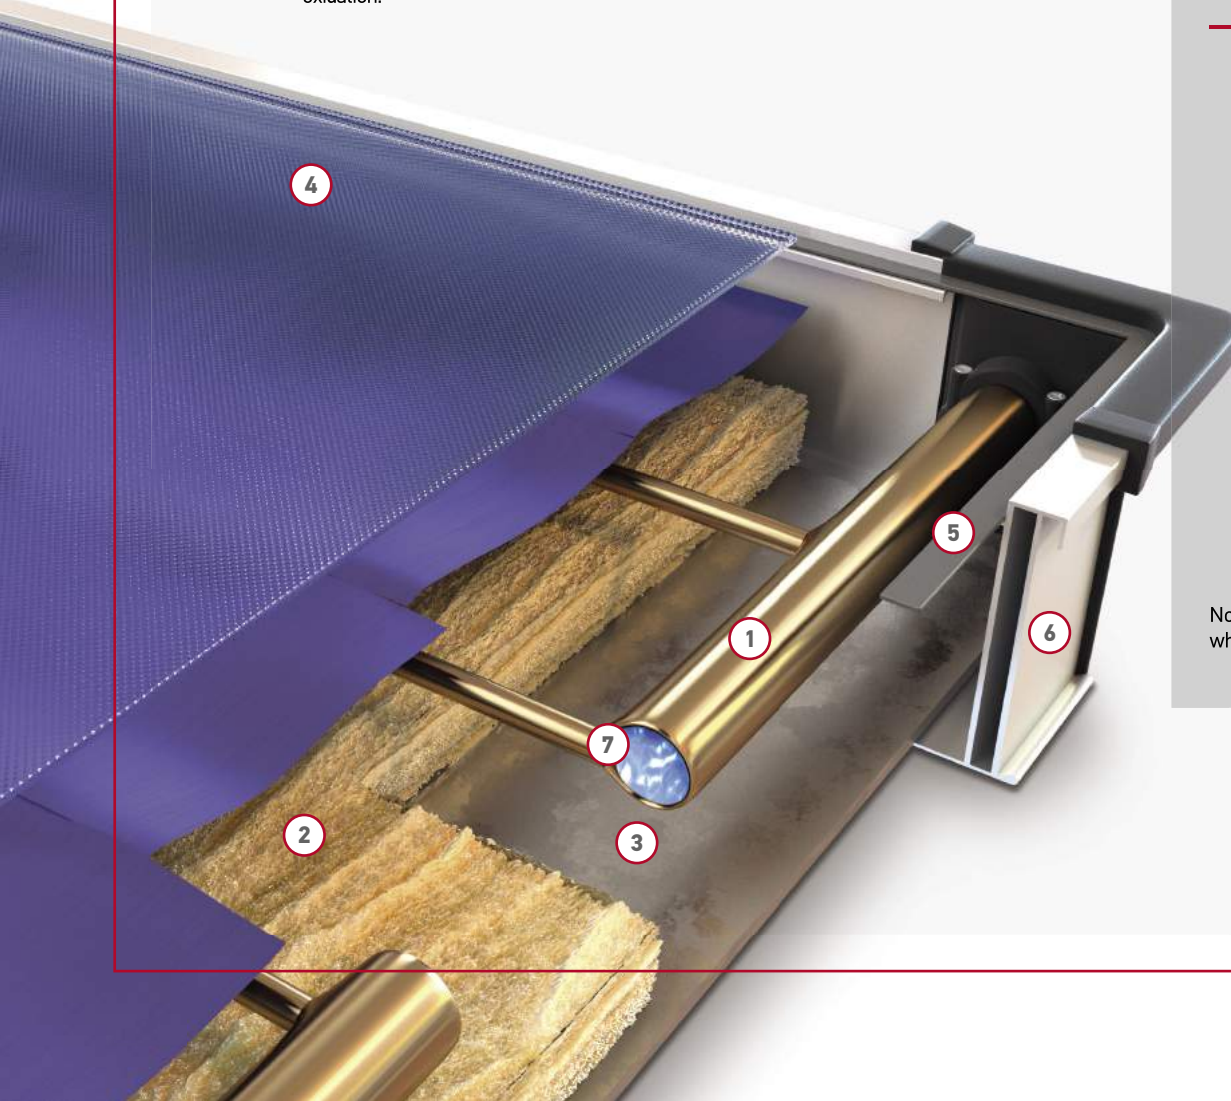

Aluminum frame with double walls for extra endurance and stability preventing any distortion (<5%).

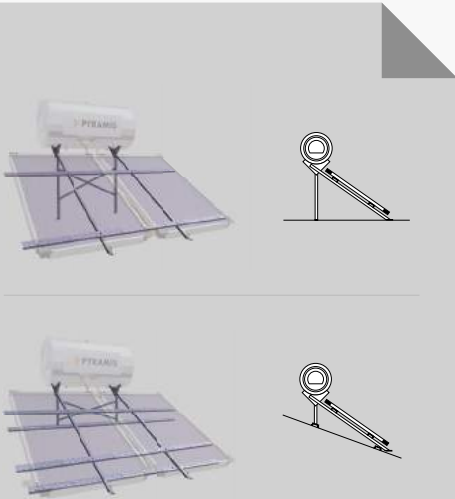

Patented special thermal bridge at the corners of the collector.

No heat loss with special angles to the collectors which provide perfect thermal insulation and top strength!

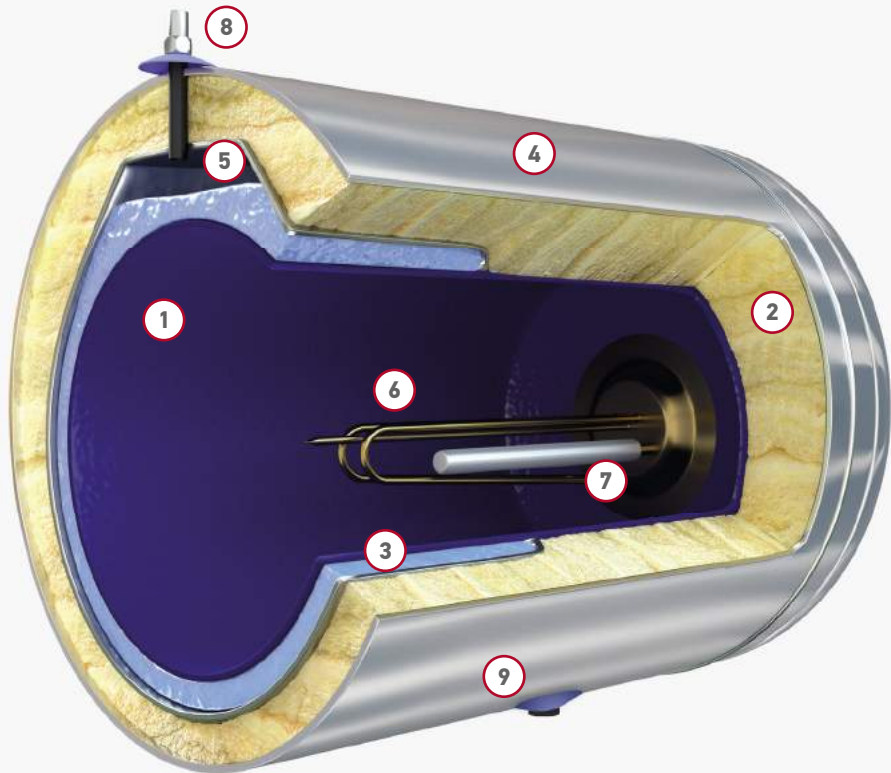

Special hot-dip galvanized mounting bases are installed either on flat surfaces, or on tile roofs ensuring safety and endurance even at the hardest weather conditions.

Special ventilation system of the collector to prevent creation of water vapor.

Separate triple energy vessel models with large surface enameled heat exchanger (G3/4" coil) for connection to central heating for free hot water in the winter.

Water Tank

- 1 Water tank made of special steel sheet (DCP) 2,5mm thick with ONE welding which is tested for pressure up to 15 bar. The inside protection of the water tank is achieved by double glazing enamel coating and treatment at 860°C.
- 2 Insulation with cast ecological polyurethane with 50kg/m² density and 65mm thickness. So the temperature is maintained for a longer period of time especially during cold winter.
- 3 Exchanger (double mantle) made of steel sheet 1,5mm thick which creates a double wall for better circulation of the thermal fluid and the quickest heat transmission.
- 4 Outer cover made of stainless steel material 18/10 AISI 304, 0,5mm thick.
- 5 Internal expansion vessel at the top of the mantle to avoid thermal fluid expansion in the event of overheating.
- 6 4KW electrical resistance with bipolar safety thermostat.
- 7 Magnesium rod for protection from electrolysis Ø26mm and L-500mm with replacement ability.
- 8 Closed circuit filler socket with 2 atmospheres safety valve.
- 9 Water safety valve of 10 atmospheres.

SOLAR WATERHEATER 120lt WITH SELECTIVE PANEL

*Double energy: functions on sun or electricity.
 **Triple energy: functions on sun or electricity or central heating.

Waterheaters - Boilers

PYRAMIS water heaters & boilers are manufactured in Greece up to the most advanced technological standards and highest quality requirements. They ensure hot water in the kitchen and in the bathroom in the most efficient way and are certified according to the EU norms 0035-1 & 60035-2.

QUALITY CONTROL AT EVERY
PRODUCT SEPERATELY AND NOT
RANDOMLY

- 1 **Outer Cover** made of steel sheet DCP 0,5mm thick electrostatically painted at 180° C that provides complete protection against corrosion caused by water vapor and moisture. For 10 lt devices the cover is plastic.
- 2 **Water Tank** made of steel sheet DCP 1,8mm thick with ONE welding which is tested for pressure up to 15 bar, ensuring:
 - Great resistance to corrosion
 - Great mechanical endurance
 - Extended life cycle
 - Less weldings means better application of the glazing process.
 - Hygienically clean water
- 3 **Strong polyurethane insulation** with a density of **25kg/m³** and **20mm** thick, to keep the water warm for many hours and to prevent heat losses to the environment.
- 4 **3500W Electrical Resistance** with safety thermostat and easy replacement (1500W for the 10 liter and 2500W heater).
- 5 **Magnesium Rod** for complete protection of the boiler from electrolysis.
- 6 **Thermometer**
- 7 **Double Glazing** internal protection of the double enameled boiler 150-600 micro that provides additional insulation so that heat does not dissipate and the water is kept hot. The enamel surface results from the application of enamel (glass) onto metal. During baking at a temperature of **830°C** a bonding layer consisting of enamel and metal is formed. So the compact structure and the elasticity of the metal are combined with the hardness and chemical resistance of the glass. After the double glazing, the boiler is 100% protected from rust because the water is not in contact with the walls, providing you with clean water forever. At the same time it has a safety valve **9bar** that protects the boiler in case of increased pressure.
- 8 **Dual Energy Heaters - Boiler** (except 10 liters)
Dual energy boiler water heaters connect to the radiator (central heating) and provide hot winter-summer water by taking advantage of the hot water of the radiator. They operate with a 2.90m (2.7mm) spiral, which ensures faster temperature transmission and great protection against corrosion.
