

*The innovative  
brand new Pyrros sink,  
now available!*

# Pyragranite Drainer embodies Steel Bowl

## A love story in progress!

Pyragranite Pyrros is the innovative, new – concept sink brought to you by Pyramis. Pyrros has a granite body with clean, soft lines, and a spacious 50x40cm deep stainless steel bowl with 50mm corner radii, integrated in the granite drainer. The eccentric combination of anti-corrosion stainless steel bowl, enfolded by the high-durability granite drainer, create a solid, robust, and yet harmonious and soft-edged result.

Pyramis' traditional production of stainless steel sinks comes together with its up-to-date granite premises and delivers to you a sink of unique design and exceptional appeal for a whole new kitchen experience.

The innovative Pyrros design will leave your imagination free to create, unleashing a strong love story between you and your kitchen. Turn your kitchen into a movie studio. Let us worry about the set and improvise!

## Materials

### Pyragranite Composition

Pyragranite sinks consist of 80% natural quartz (silica), while the remaining 20% of the mixture consists of resins and other substances that assist in binding. Mold, stains and unpleasant smells are often caused by bacteria. Pyragranite homogenous, without pores, surface prevents the bacteria accumulation making your sink cleaner and safer.

### Stainless Steel Bowl

PYRAMIS uses traditionally the best quality performance Stainless Steel material AISI 304. This type of stainless steel contains a significant amount of chromium, and sufficient nickel to «stabilise» the microstructure, that gives to these steel goods formability and ductility. The typical composition is 18% chromium and 10% nickel and this makes PYRAMIS' Stainless Steel Sinks extremely resistant to rust or corrosion in normal household conditions.
